Dear Gary,

I found my original of the Katzenbach memo I'd thought your crew might have gotten mixed up in what it copied. The mixup was here!

I hope the shows were well received and that you were satisfied with what was aired. I've heard nothing about them.

Separately I've written Dave Perry for copies of the Dallas police records that were disclosed.

If you also have them and he is too busy working on them to make copies I hope you can find the time.

I'll be glad to pay the cost, of course.

While without knowing their content I do not know whether I can, I think it is possible that I may have relevant records.

I know I do on the three men Gus Russo told me the new records reflect were held for three days and are identified in them if anyone wants them.

If you have not heard from him by the time you get this you will soon hear from Gerald Posner. He wrote the definitive book on Mengele. He is working on an assassination book. He and his wife were here last week. Lil and I like them very much. They are good people and his approach appears to be responsible, unsensational.

With many of the kind of interruptions of which you know I've been working on an article about the Commission's counsels' proclamation of not covering anything up, etc.

If any stories on this appeared in papers you have I'd appreciate copies.

For weeks it has been almost impossible for me to get anything done, inquiries by the media and others have been that frequent.

Last week someone from 60 Minutes phoned me about a segment, undescribed except for the anterior neck wound in which they are interested. Posner believes, from a conversation with Cyril Wecht, that the interest is in a coming book by Gary Shaw and one of the doctors. If you know anything about this I'm interested in its title, publisher and when it will be available so I can get a copy, if you can tell me. I'm also interested in anything you know about it because I'll surely get inquiries from the media before it appears.

Thanks and best,

Harold
