

Dear Gary,

1/3/85

The enclosed is for your information only for the present. Please do not tell anyone, not even Jack, about this until after I've had a chance to keep at it and see if I can get anything else out.

The man in whose office this stuff was found was in a liaison role with NSCA, of that I am certain. I am not certain but I do believe that he was assigned to JRM matters over a period of years.

What really excites me is the fact that reference is to a single dictabelt only. This, to me, strongly suggests that the NSA panel worked with a dub. Oh, yes, the same office was liaison with it.

The duplicate dubs for which I offer to pay are for you. This will undoubtedly be faster for you, whenever they are duplicated.

I am working on a petition for an en banc rehearing in the case in which these records are relevant. While there is little prospect of success in this, I am doing it and it will be ever so much better if there is no noise from the nets or the legitimate researchers.

No way of knowing if they'll process and send the located documents promptly, as I ask, but if they do, I'll send them along.

If you can think of any names to be run through the indices other than Bowles, the names of those in the DED who may have been involved, please tell me. I must get back to work and can't take time to think about this.

A good year to all of you,

*Handwritten signature*
