

Dear Jim,

11/14/74

Your 11/11 reports that the 10/31 enclosures in a letter I mailed from Memphis was not postmarked until 11/4 and then took longer to reach you than what I'd mailed from here 11/4 and 5.

I may well have kept the letter in my pocket for a short while before I mailed it but I could not have mailed it the 4th because I left on the 2nd.

There were, as I noted, indications that could be taken as of surveillance and overt questioning about me. This may or may not be part of something that may have gone on. I was, as I told you, sufficiently concerned to have obtained legal counsel.

I recall where I mailed letters but can't distinguish between them, not recalling the sequence. I did mail some at the bellcaptain's desk several times in the motel. I also used a Main Street box. It is possible I used a chute at the airport but think not. Interception would have been easiest at the motel.

In any event, wherever I mailed it the latest it should have been postmarked is the second. So, something did happen to it before it was postmarked.
