5/20/92

Dear Mr. Nankiewicz,

Thinking about the rather exceptional thing, to say the least, that the AMA did to criticize your client yesterday leads me to make a proposal I may decide against after I think about it further. I'll have time for some thinking tomorrow. I'll be hospitalized for some test tonight but I'll be home Friday.

Some of what I've been able to do I did by means of what I regard as intellectual judo. Often enough it has worked.

I know enough about the AMA statement without having a copy of it to be absolutely certain that I can, with fact alone, and official documentation, utterly destroy it.

Because of the AMA's power, influence and importance that with luck can be used against it, I believe it is possible to make it impossible to regard the official JFK assassination mythology as anything other than mythology.

I would get little or more likely no attention for what I'd say and produce but I think it would be different with you and your client. Especially because the AMA statement was aimed at him. As I am prepared to show you, limited almost entirely to official records all of which were available to the AMA. With official pictures, too.

The exception is that the doctors lied in saying they had been silent for 29 years.

Whether or not this appeals to you I'd appreciate your sending me copies of the AMA statement and anything else quoting any of them. I'll love the quotes!

I'll be preparing what I have in mind in any event but if you are interested I'll let almost everything else wait.

I ask nothing for this. My only interest is a truthful and accurate record, without any theorizing or conjectures or dramatist's license or anyone else associated with it.

I believe that with your client sponsoring what I've seen referred to as a documentary he'll find what I have and will use of interest. at the least.

Sincerely,

Harold Weisberg
