8/4/93

Jim Marrs Box 189 Springtown, TX 76082 Dear Jim Marrs,

As Gary may have told you, I was in touchwith Evica over his notion that a paper on me as a government fisinformation agent would he nice at the Rhode Island confab he and others held in the name of The Third Decade. I waited until a couple of weeks after that gathering to write him so he could no make any phony claim about trying to interfere with it. He did not respond. I wrote him again more pointedly and then he did reply, with the either insane, has no credibility at all or both. But in the course of it he,without being as specific as he could, indicated that the idea originated with you and Jack White, both with no first names. He also had not responded to my asking him if in fact the idea was Harry Livingstone's.That would fit in with his coming attack on all of us as conspiring against him and helping those who killed JFK. I am anxious to collect all the information I can relating to both of these matters. From Gary Im understand that in fact it was Evica who proposed the idea to you and Jack. I also understand that Harry left an outrageous message on your machine and that your children heard his profanity, etc.

As you probably know, some months ago Harry was rather violent in a number of letters. I collected copies of all I could and took a selection of them to the states attorney's office because they seem to be felonious under the Haryland Code. I have heard nothing since then. From what I was told I think it is not unreasonable to believe that no decision has been reached. That a write has involved can well complicate the decision. If they do take a case against him, I have no desire to hurt him and I would ask that if convicted he be sentengeed to the medical care he needs- and has in the past had. As he told me himself.

If you would care to give me a dub of that tape and any statement about it and anything else relating to ^Harry I would give that to the states attorney's office also, unless you did not what that.

That Evica et al had such crazy notions does not disturb me all that much but I would like to leave as full and accurate a record on it as I man.

I also ant to be as well informed as possible on all aspects because with Harry's book clearly aimed at all others, including me from his letters, I/want to be as fully infommed as I can for its appearance. I think there are nough reporters who knew me well still around who might fall, as might some reviewers.

There was a Baltimore City police investigation into Harry's hiring of those cops. I do not know if it is over and ropped or still active. My hunch is that they'd like to do something that would not in itself be scandalous but I've had no contact with them and do not intend to initiate any....Thanks for anything you may send me. Sincerely, Harold Weisberg

Harde
