

Dear Dennis,

11/14/96

This is hasty acknowledgement of and thanks for your letter of the 11th and the returned La Fontaine ms. that I'll not be able to look at until I clean up a mess made by the woman who is retyping the Prouty ms. She has not returned half of a chapter in either rough draft or retyped and she has retyped more than she returned rough draft for. Ordinarily her typing is fine but this time it isn't. She'd been in the hospital for a day. She told me that anaesthesia knocks her out for a day or two. Something surely did! And if I recall correctly she told me she'd proffed this!

I'll write again in a day or so. Tomorrow I'm tied up.

I try to get a disk to Dal McQuirk in Auckland, NZ.

(He uses Microsoft Word Version 6.0.)

Thanks,

Fortunately I've a copy of the rough draft.

I've wasted all the copies I made to now but this is worth all that time, trouble and cost!

Dear Harold:

Hope all is well.

I am sending a package today containing the corrected version of the LaFontaine manuscript which I completed over the weekend. Also, I will enclose a couple diskettes with copies of the book on them. After you have had a chance to look it over, you can let me know to whom I should send diskettes. I assume that Wrone, Ginnochio, and Neichter would like to get it. Let me know who else.

*fme*  
I tried to electronically scan the documents that are included in the book. They sample we attempted scanned without problem, but the resulting electronic file of the image takes up too much space on a diskette to make it a practical way to distribute. While we can fit far more than a book length document on one of those tiny disks, we could only fit about three pages of images of documents on a diskette. As a consequence, it seems to make more sense to simply copy the 16 or so pages of documents and include them in the mailing of the disks. That is what I shall do if it is OK with you. Let me know.

Take care and regards to Lil.

Sincerely,

*Demi*

*P.S. - I increased type size from 10 pt to 12 pt. It should be quite readable now -*
