Dear both,
There will be a delay in my sendink you any part of Inside, as I Iearned in tryin: to rotredeve what has been done fron the Hood słudent and former stiment who had been wollinv, on it. The former studont was doing very well but first she got a job nnd then promotions that entailed longer hows. Between her and the student who was to roplace her the roplncement was to have fotean all from her. Several time when $\bar{I}$ phoned the replacement there was a recordel announcemint. I left messages and got no responses. I assuncd she and her family were on vacation. I phoned again after you left and again fot no response. But Saturday I did. I asked hel to bring it all to me and she than told me that she had Not gotten it from the graduate. I then called her and the recofded announcement on that phone cave the name of a different woman! So I left a message on it askine to be put in touch with her. There was no return call Saturday or yesterday Somewhere I have the address of the graduate and when I find it I'll write her. She should be having her mail forwarded. I think also I have the phone number where she works in Washington. What I want most of all is the diskette. About 20 chapters were done and correctext. But if there is any real deláy I think if it does not entail too much computer work later I'll send later sections. $\perp_{t}$ is in sections that should appear as parte, by subject. I at confident they will need wohe rearranging. The box in which I have Inside is heavic" than $I^{\prime} m$ permited to lifit. It is atop the file cabinets. So I've been incerting them physically without checking to be whether they are inserted where they should be.

I can tell I think what chapters are out $f_{0}$ be retyped and what are out for correction of what vas retyped. If so that can sive ne a place to start if as I believe, what is on one diskette can eassily be inderted into or added to an existing one. If this is so then when I have it all it can be put teogether as I had in mind or it can be corrected and inserted where it should be rather than where $I$ had in mind.

I have discovered a problem that did not exist for me before when I had two diferent students doing this. For some reason not apprent to me the two Malaygaian Girls slifted margins. If the mingrins are unchanged checking the corrections is much eanior and faster, even if the corrections change lines and paragraphing. They were worling on my Hewman work. They were also two weeks late in brincing it to me. I suspect that was so that the one who was doinc the typing would have no more to do and to indie the ripoff I suspect possible. Their time accounts are not credible and they had no accolntinc of the tite with then. They are to provide it. 修 the retyped leaves today for anotion college.

It hapyens that the college did not remove the notice of ny looking for
typing from the bond．I got a call lest week for a student looking for work．She is f from Chan and low to one of the Malaysian girls，the one who is staying tat Hood．So I＇ve sent her the leman Epilor＂ue．I＇ve been delayed in re＇urning to the Afterword I have atomterl．$S_{0}$ ，hopefully，before long I＇ll have that ha ty and rough ms．completed．

The other lialagian ivy in studying computers．Ind asked her to get me a mintout I could use from what was eliminated Iron $\mathrm{H}_{\mathrm{oaz}}$ ．She delivered that on Saturn－ slave，ton．So I＇Il bo able to nd d that to the＇tailor book when $\perp$ clean this Itewmen one up．At thant this is my plan as of today．

Toclny a cousin wide drive us to foplcins for belayed seni－annoual cardio－ vascular chock on the legs．It is an afternoon appointment and the trip alone usually tires we．But absent new interruptions I should hero the connections in the Neman ms． chocked bu forlorn evenifis and then，honofiluy，I can return to the Afterword and when If en n after that er beck onto hailer－about which I＇ve already forgotten so much！

Lave was excited when 1 told him of your offer yesterday．As we are．I was just tolling．to $4 i l$ about that and think that once we cen replace our paper supply we＇ll． con it all beaning here I wa contain there will be no dupfration．I＇ve been ma＇firs contos as a protection ngaimet a part of a section getting lost in the mails，etc． Rezused $1 / 25$ ．I＇ve written the former student at her place of work and hope to
 hath mo urn to the 并arbados to see her Tautly ant is back in Frederick．I should hear frow lr av sorn．

If I dis not mention it above，the student who is to take over what remains to be dove on the leman ms．is from Ghana．She speaks Ln，fish without any accent．I＇ve asker the Linloysion student to ask her to come and see me．The Caller ID reflects no cal．from hor when wo were avo y yesterday．

The I do hop n that work，on both monuccuripta，does continue and bettor than the ton inclagaion dial dice．Hoot of thy commotion I＇ve picked up were those she ignored and that is had lath！

If we en u wetly ant the paper tony and then when she cen till will start the copying；meat here the works is out to be done ant hasn＇t been．
