

11/6/96

Dear Dennis,

The Woman who is to work on the Mailer book is out of the hospital and was here today. The computer program she has and to which some of the Case Open chapters are to be converted is Word Perfect 5.1.

Those chapters are 14, 15, 20, 21, 22, 23, 24, 25, 26, and 27.

Cardiologist at Hopkins yesterday commented repeatedly how good I look. That is speaking relatively.

I reminded him that two months ago he'd reacted to my high blood pressure, high with medication, "That's the least of our worries."

I did not then think to ask him what were the serious worries.

So yesterday I reminded him of <sup>this</sup> and his reaction, with no word spoken, confirmed my belief, "Then what was worse was the heart and the kidneys."

With two additions to two medications for it the b.p. yesterday was 195/75.

Mail just came with the epilogue and Afterword for Waketh. Many thanks.

Bill will be a bit upset. He did not have them and he has been making and binding copies. When corrected he should have a disk.

Many thanks!

On our way for Bill to have a Sigmoidoscope. Just a belated check after the diverticulitis you'll remember. She has been careful in what she eats and it has been no trouble.

Exactly what Ronnie Hinkins told us when he heard about it. After his first spell he has, he says, been eating anything and not paying for it.

Haven't heard from him in a while.

Best to you both,
