

Dear Dennis,

11/11/86

The young woman Jerry told me is looking for work is married and was away for the weekend. She and her husband were here, just left. She has more time than anyone I've used, likes typing and does 70 wpm. Her name is Minny King if I later refer to her. Her recollection is that she has Word Perfect ^{5.2}~~6.1~~ with windows and Microsoft Office. Her husband is not sure about the windows and when they are home he'll check and let me know.

That may not be material. I thought to ask the woman who does not have the time I'd like and to whom I'd planned to give the Mailer book to do. It is her recollection that what was done was with Word Perfect 6.0. So, the conversion should be, I suppose, to Word Perfect ~~6.0~~ 6.1 with windows or as an alternative Microsoft Office.

That would also be true of the chapters not used in Case Open titled:

Penetrating the "Impenetrable" for "America's Tolstoy,"

Posner's and Random House's Impositions on Trust,

What Some People Won't Do for Money,

Holy Water in the Vampire's Face,

Stake in the Vampire's Heart,

Ignoring the Truth,

That Dubious ~~Epitaph~~ Epitaph,

Baring Asses,

The Ruby Diversion,

Judge and Be Judged

What Happened to the Truth? Posner did!

These are followed by new chapters written and waiting to be computered, two.

I've ordered Hard Evidence by David Fisher at I think Dave's suggestion.

What by the way is windows in computers?

Best,
Herald
