July 3, 1975

Dear Harold;

I have two people interested in the possibility of publishing Post Mortem. They must read the book. Is it possible to get a xerox copy? Have you had the book to Bantam Books? I have an opportunity to give it to Irving Mansfield to read. As I have nothing to show the people I talk to they can only indicate an interest until they see something to read.

I talked to my source about Mac. after our phone conversation and this is what he remembers: Mac had been a stock holder in World Associates and was president he ran the company thru 2½ million without producing anything. It dealt in supplying products to law enforcement agencies. It has moved to Redwood City, Calif. Mac worked for Howard Hughes in the SkyNight program which was selling ~~planes~~ helicopters to police depts. Mac is a plane and helicopter pilot but my friend would be surprised if he flew a U2. Mac claims to have been trained as a killer while in the OSS. Mac has a wife a chemist and a problem child. My friend says he can not be too objective because of his unpleasant business dealings but that he feels Mac is not the most reliable man and is pragmatic in the use of truth.

Please let me know about Bantam Books and anything else I might be able to use in helping push this along. Hope you are well.

Sincerely,
