## Hunt for Ray Futile

By CARL T. BOWAN

WASHINGTON — The disappearance of the slayer of Dr Martin Luther King becomes more ceric and revolting with every pessing day.

The FBI has not come up with a single meaningful trace of James Earl Ray, the Number 1 suspect, since I revealed several weeks ago that the investigation had taken

on international implications.
Even with \$100,000 or so of reward money lying around, the FBI hasn't so much as a hot tip or a rumor worth pur-

suing with hope.

In my earlier column, I deliberately did not reveal that a massive dragnet had been set up in Mexico. It was there that Ray had met with some characters who led FBI and other intelligence agents to suspect involvement of a foreign power. But investigators did not want the suspect tipped off as to the intensity of the search south of the border.

But it has revealed nothing.

"WE'VE COVERED Mexico, Canada, and the United States like a blanket," one high-level source tells me. "If Ray were alive in any of these places, I can't conceive of our not locating him by now."

Thus, the men who were clinging doggedly to the theory that King's killer was a berserk loner have now swing over to the belief that a hired killer planned the murder and the escape meticulously. But was it Ray — or were the seemingly clumsy clues left behind just decoys? And who did the hiring?

The truth is that the FBI has not located a single trace of Rny since he supposedly abandoned his white Musiang in Atlanta on April 5, the day after the Nobel Prize-winning Negro clergyman was slain in a Memphis, Tenn, motel. In fact, the FBI does not really have solid evidence that it was Ray who abandoned the lear in Atlanta.

BUT THE massive investigation has turned up more information about Ray and his family. The most sigmificant — and most galling in some Washington circles — is that Ray was peddling dope while in prison in Missouri State Penitentiary from 1960 to April 1967.

As the magnitude of Ray's narcotics peddling has been revealed, too law enforcement officers here have started agnast at the evidence that guards in most prisons are so easily bribed into sending almost anything into or out of a prison.

So me investigators have concluded that our penal system is rotten to the core, and they have sent acreams to the top of our government that it is high time someone planned a complete overhant.

A SERIOUS question arises now as to how long the FBI can, or will, continue a concentrated search for Dr King's killer. Already, student turmoll on scores of campuses has dictated the shifting of considerable manpower to the watching of these activities.

There are some worrisome connections between rioters on the various campuses. For example, one of the leaders of the Columbia University demonstrations recently showed up at American University here, trying to agitate students into putting some "muscle" into their protest.

So this confluence of demands on agents' time has led even some FBI personnel to each earlier pessimistic predictions that "they'll never catch Dr King's killer."

## FBI loses some of its shine

.The hunt for the assassin of Dr. || whether it really took that long or Martin Luther King Jr. has taken some odd turns, and one of the more linformation. unusual ones is the way the Justice Department and its agency, the Federal Bureau of Investigation, have been behaving.

Immediately after the killing Atty. Gen. Ramsey Clark exuded optimism about an arrest. "We are very close," he said. A few days later he said he hoped to provide a picture of the suspect. But it was not until a week after the murder that the FBI inadvertently disclosed the name of Eric Starvo Galt.

And so it has gone since April 4. Clark's optimism has faded, and the FBI has seemed almost intent on keeping the public confused.

The FBI's image as the smoothest man-hunting agency was tarnished by the length of time taken to identify the fingerprints of Galt as those of exconvict James Earl Ray. It was 15 days after the assassination. In question is whether the FBI was withholding the

It was not until Sunday that the FBI put Galt or Ray on its most wanted list. The success of the list in apprehending wanted persons over the years has been good. It is hard to understand why the description and photo of Galt were not released as soon as they were uncovered.

The FBI could never be accused of being loose-lipped, but the most wanted list was a creation of its director. J. Edgar Hoover. He has always been proud of the role it has played in apprehending those unfortunate enough to be listed.

We wonder if the recent policy adopted by the American Bar Assn. against pre-trial publicity has unduly influenced the FBI. If this is the case, the results are plain enough. The public linking of Galt and Ray was made about two weeks after the killing, and no one has yet been apprehended.
