

Dear Art,

11/12/80

Despite the continuing problems it appears that you have a beautiful thing in a beautiful place.

Hope everything goes well and that your former opponent drops his attempted blackmail. Maybe if your lawyer can convince him about blood and stones he will.

If you have your mast as high as you can get around there, 3KW will get your signal around quite abit. I get a 10KW regularly from Phila. and a much weaker one dependably from Washington.

I am aware of the pollution problem and phenomenon from local experience. I could tell after getting back from Washington whether there was any pollution alert because of how I felt and when I was able to walk and climbed up the mountain every morning, on so many of them I could see the flitky/lying like a cloud over Frederick.
stuff

On your facilities, I remember years ago people would get an old house and use it for everything - studios, xmitter and offices. Maybe you can do that?

Saw the specialist at Georgetown yesterday. He said he'd have liked to feel more warath in the left foot but I'm coming along OK. Don't have to go back for three weeks.

Probably the new battle brewing is over the old spectfo suit, where the DJ is again stonewalling after we won another remand from the appeals court.

Another possibility is the FBI's revocation of the fee waiver I'd won.

Plenty of battles, but I'm nor sure I recall which one I had in mind.

Now I've got to get back to on old one, the King case, where there is always some new dirty trick to be responded to.

Our best,
