Desr Sylvia,
iifith whet hes been publighed, as you reocunt it in your letter of $\leqslant / 19$, I heve lit le arement, but with whet is inberent in what you argue, tbet there is no difierence on this subjoct and any other, or that thern is res. freediom of publication on this subject, on that every reslly important book has zot heü troubles gettine published ot oll, there we pert conpany. 'ronkly, I connot reconefle your wori with your fine intelligence, your rerenol experlence tind, in ffet, your ststementson tie publishebizity of an erticle be sed on 1051 Nowill III. Tnat your book wes ultinetely published, or thet a progressiveminded editor 4 as hokpful, is not rolevent to the point, thich ree not could sme thine ultinetely be puolished. hen was your book published? Thot is one of tho great tragedies, thet so fine eqorik had to aweit the publifeher accoptebility tod be esteblished by inferior worke. You reounted to me the ilfficultiea you had. Thet there was no great trouble gettine any index publiched is meaningless.

You kion my experience with MEIMEMASH. Would you care to read the letters from the sditors, who ild not make the decision snd honestly told me this - and on whet the decision res besed? Dell, which finglly ceme to me for the bonk, refected it three tines, twice without reasing it at all.

The cesed of tpetsin and ropkin srenot repliy appliceble, because both had apocial sußpicies end special doctrinas: Csseld essassin, which is hardly disogreenent with the eovernment. Hor is \#ystein's esseuly on Verren personally while shielain those with erester operetionel responsibilities the kinc of writing tipet has difriculty in the merkey place.

Your pemort an the noor cuility of Lene's monaucript coincicioa with meny thut reeched me, including fron the eitors tho rans ond refected it - tho volunteered this, for - had no knowledge that his book hed been in their hends. But you yery well know thet with a hot subfect, that ta no disouelification for a book. t is for tilis purposed thet publishere ave fitors.

It 3ast the easieat thing for puolsher: to tell me they didn $t$ like, the book, that it vas pooriy cone, the stinderd thinge. But so very mony didn t. Two the lergest were oyite specific. One spelled out his feer of the governinent. The other eeid reta heve ben interested if the book could keve been flewed of fect ("Our cecision wes not esitorisl enc not eesy to errfve at"). or the nuncer of executive editore who vent for it and predicted best-seller stetus only to asve to report the negetive policy decision. I smestounded that
fow take the irrelevant as the funabmental, taat you take e few mincr excentions as typical. But tell me, prey, whet mejor publicetion nes done ony pioneering publishing of any new criticism, whet had not sleendy keen brought to light? or where TV aid it (CES, NEC, which refusea even fairness-ioctrone time?)? or or UPI? nere, where the vice-oresident ordered an annivergary lece from me in 1967 ond liked it snd put it on the wire, it wes alnost univergally killed in the of 1 ices of tia suoscibers. hould you lice to see iny letters from Juropasa acentó Forelgn correapondenta without end?All in the some direction.

How cen you invoke Sauwage' a book when you know ite nonowbliohint history, know what R-H did with it, that Forld almost junked it efter eont:acting, end that it rook two years to zet out here.

Before the m thinge were not so bed. Lane s contract wes for pre-

listing with which I sm familier except Fox. Theee, $e_{5}{ }^{2}$ understend it, Award got hith to dc the job. Need I tell you the subsequent history of and at Award, thicis is a mincr house lis any event.

Libels such es Lpstein has in this week's Sunday 'imes that estimeble journel finds publishuble. Thet from the othor side? Theyturned down, in thet some sundey magazine, hhat liernison Selisbury recomended to then.

Irenkly, when you write so you trouble me, for your certainly know better than to orgue there is not erest aifciculty in getting gny real, solid criticism published enywhere on this subject. Vvan the minor publicstions pleyed rronounced favorites, were rems rikebly prefueificad.

I wish I could bs optimistic wher interest has besn expressed, even where thete bes been lower-level aporoval. My experience precludes this.

Of course, I agree you shoula not undertske what you do not
belfeve in. This does not bother me. this is the way if should be. Thet you believe so contrary to recent history is vhe re I worry.

I mrote you zad forgot to meil the encloasd.

> sinicerely,
