Dear Joan,

Reur ~~my~~ request for Garrison info in the San Francisco paper, you should have ^{it} gotten some response and you can't be careful enough with at least three I know of - those who fed that French CIA stuff to him and since then have not been honest about it. There are others, but ~~two~~ of these three in particular will not want to actualities in your book.

Ditto for some of those who may respond ~~from~~ from the LA area. Some of both I can document.

If you get a negative from your agent on the ~~Hersh~~ Hersh - It please let me know because then I'll make another effort with another person.

I do not recall if we went into the ^{King} King/Ray business but I'm working on that, with an un^{intended} assist from the literary whore Ppsner who has been whoring with our history for a while. New career for him.

What Lesar and I did and faced is a helluva story, I think.

No theories, attested-to facts.

⁺⁺Hope your work is going well and that what you got here is useful. If you have any questions about that long memo I ~~gave~~ gave Sciambra, I may remember some of that.

Best,

Harold
