

Dear Ma: Some time ago, in writing you
about this L. activity, I told you that my work
had been making a respectable, a history and that
I was doing this with this matter at greater length than
can be used as a response to a letter. I also told you
that because my typing and writing are terrible, was now
it, revised and that I would have to correct some
sucked up. However, additional medical problems, and
when I a 87, make my taking any more time
with this paper, I am not; that many corrections
and I typing is less.

While what I enclose is rough and needs editing,
the notes part and I think you people would be well
served by what you can learn from it, particularly
about accepting government statements about
questions and doing that for those who defend their official
propagand, especially when they defame other and
corrupt our previous history.

Write so that you be able to fight, rather than
your position so that the standard of American
history cannot be used for propaganda, so that it
can be only part of our history.
