Dear Bill,

2/17/6

Thanks for the stamps and your 2/13.

We are still in good shape on supplies, thanks, and I think some time this weekend I'll try one of the ribbons.

We had another six inches of snow yesterday and with the temperature at minus 10 and a wind of up to more than 15 mph gusts I'll be in all or most of the day!

But the good neighbor who has done it before cleared out lane again!

Glad the box with the masters got there in good shape. They were made by a large commercial outfit in Baltimore and were also used by a local outfit that went out of business. I've never even looked at them. Kept them as they were given to me.

I appreciate very much what you and Charles are doing.

And of course I meant what I wrote in the books.

At the moment I'm a bit overloaded with what has been returned and I have to read.

If digging himself out does not take McNight the entire weekend we may get a chance to talk about the situation at the college, if he is aware of it.

I think I have the entirely different Oswald in New Orleans master in the basement but I think, too, that it can be used for a new master that would be six inches high. Of course it would be better if that also could be both sides of the page. That would be half the size and half the weight for packaging and mailing.

~~My~~ thanks and back to work!

Haro, I
