Tear Parold:

Thank you for your letter of May 29th. I'm glad you like my son. I have some color slides I have taken of him. Will send you some prints when I get them made from the slides.

I also must thank you very much for finding the time to write a forward for my book. You may send it whenever you are finsihed, time allowing. I have allready been putting out some feelers to different publishing comapnies in the Toronto area and four have expressed interest. Mowever, no decisions will be made until they see my work, the content and set up of my book. My first actual interview in this regard is on June 28th. At least it's a start.

I think that you probably know pretty well the content of my book from our previous letters. As I believe I told you in the past it is an extension of your original work with my following up on the leads you left in Photographic Whitewash. As for actual quotes, the only one I have used from Photographic Whitewash is found on page 89, the last sentence.(i.e. The only inference... to establish it.) However, I have tried to get across the point to the reader that it was you and your researches that brought shout the discovery of the Similas case in the first place and without this groundwork no story on Similas could have giver been possible. About the only bit of work I've done that I don't think I've told you about is in regards to the Fimilas photo run with the first Liberty article. But, before I tellyou, I also ask that you keep this point between ourselves for a while. I know from other latters that I have received from others that you pass a lot of my work on to others, especially to the west coast. However, I tell you this point in trust because I think it is important to my book.

In Photographic Whitewash you observed the discrepancy of open and closed windows between the Dillard photo and the Similas photo run with the first Liberty article. (page 82) As you stated at that time, someone on the 6th floor had to have opened the window to the west of the "snipers nest"es it appears in the Similas photo. I at first thought this was a minor point, with parhaps, as you also suggested, an incontious polimeran doing it. However, when I began to look into the time element involved, it becomes a rather important point. The Dillard photograph was taken 3.7 seconds after the fatal shot. (Sprague's estimate) A second photo taken by Jim Murray of Black Star shows the window closed as in Dillard. The time of the Murray photo is 12:75 (approx.) I now know the Similas photo to have been taken at 12:75, or three minutes after Murray's! Transfers sometime between 7 and 6 minutes after the shooting someone opened the window in question! It couldn't have been Oswald, because he wasn't there to begin with, and taking the Tarren Feport at face value he was supposed to have left the building at 15:73 according to their fictitious "reconstruction." The Nurray photo shows the window still closed at 12:73. This open window takes on an even more startling meaning when compared to the Hughes film

and "eaver Folaroid still. The open window in the Similas photo is the very same one which shows the prescence of the humanoid shaped "figure" behind it at the time of the shooting!! Perhaps this is the individual who opened this window. I say this because in preparing an Appendix to my book concerning this matter I have been unable to find mention anywhere in the 26 volumes or elesawhere of a police official or someone else aiding in the mearch who was in a position to have opened the window between 12:33 and 12:38:41 Dr you know of anyone who could have been to the 6th floor by 12:33.77 If so please tell me. However, I don't think there was. If not, this Similas photo proves that there must have been someone other than Oswald on the 6th floor either during the shooting or shortly after. Perhaps the opening of the window was a signal of some sort. It ties in nicely with the white Perbler station wagon picking up the Oswald look-alike Graig saw at approx. 12:43-12:45. Also, as you mentioned in Fhotographic Whitewash, any photo taken after the Similas picture shows this same window open. These include Willis 12, UPI photo's.

I hope you will keep what I have just revealed to you quiet for a while, depending on how successful I am at getting my book published.

Am glad you had a good and fruitful trip to New Crleans. Was also glad to hear that you spoke to the Kennedy Assassination Inquiry Committee in March on "Oswald in New Crleans." I would like to hear you speak some day. I would also like to come and visit you this summer if I can find the time (end money:). Perhaps we can work something out at a later date.

Well, I must go for now. Hope to hear from you soon.

Respectfully,

Dear Gary,

Our letters crossed. I will say nothing further about the windows.

You should also talk to Bernabei immediately, if you have not already done so.

There are also other things you may want to include, other pictures of which apprague may have copies. I have published some of what observed in the other windows, for example, people other than the fourth-floor women. Perhaps this will fit. Look under "Day" in WW and you will find other pertinent testimony, in that case on the moving of the boxes. I think you kight went also to use what I have published on the Baker reconstruction and the hiding of the rifle, etc., and again you are welcome. I think you should consider the Rowland-Walther evidence in this, the only correct context, perhaps blending Euins in one version with Rawland. Make that part as complete as you can, even if it means repeating what I have published. You are welcome to it and to any documents I have.

Inadvertently I omitted the NYTimes article from what I sent you. It is enclosed now.

I camed dispute your reconstruction of the timins, but again I sak you to consider other things, like Ars. Reid (NW), Arnold PW), and more I can perhaps give you if you desire. When you deal with Hughes, trace the deliverate FBI withholding from the Commission. I cannot now tell you why, but I encourage you, insofar as you can agree, to emphasize what the staff (which includes the FBI) knew and withheld from the Commission members.

I know of no official in a position to open the window, no official wffort to learn the did or when. My belief is published in the form of the question of which you know.

I can write the foreword almost any time you ask. Would you rather have me read your me first? How long do you went it? Do you think it would help with a publisher?

I have sent you all the documents of which I have copies not pested in the script of PW. Want anything else?

Best regards,
