Dear Harold:

First off let me thank you and Lillian for the kind hospitality you accorded my associate Ritchie and myself during our most recent visit to Washington. It was good to see you again and as usual we both came away with a feeling of accomplishment. As I have so oft-repeated in the past, I could literally move into your basement. Your cumulative record does represent the finest repository of materials available anywhere in this particular field of study - and that includes those records that currently reside at the new Archives II, College Park, Maryland.

You will find enclosed a number of things. I am including a copy of the explanatory correspondence I forwarded to Carlos Lechuga on your behalf. I hope that it garners you the results you are seeking. If I can ever be of future help, in any endeavour, please do not hesitate to ask.

I return also your high density floppy disk. I perused, downloaded, and printed the information that it contained and have enclosed for your records a printed copy. I hope you do not mind, but I made up a temporary title/face sheet for future reference.

I have enjoyed the contents of Epilogue 2 (Waketh The Watchman) and will write more in the near future. I know that you are extremely busy and selective with your time and workload. However if you could find the time to peruse the work which Ritchie and I have sent you in the past - The Palace Guard - I think you would find that we agree with much that you have to say. This is particularly true when it comes to means, motive and opportunity as you overtly suggest in your most recent writings. The hand of the military lays oppressive and ominous throughout the assassination landscape and must eventually be exposed.

I will not linger long at this point in time. Once again I thank you for your patience and your enduring work. God willing I expect to see you again in the near future, and, when I get my current work on Governor Connally completed I will forward it to you.

All my best to Lillian,
