Dear Mr. Weisberg:

I am writing to report several errors or problems with your recent book.

In an apparent publishing error, the index has not been included. Page vi of the Contents section shows an intended index beginning on page 499. My copy of the book ends on page 498.

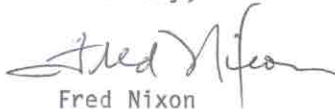

*wrong*  
On page 428, beginning on line 14, you assert that the Church Committee, "was under Pennsylvania Senator Richard Schweiker, who was Ronald Reagan's running mate in 1976, when Reagan ran for president and was defeated by Jimmy Carter."

*right*  
In 1976 Jimmy Carter defeated Gerald Ford whose running mate was Robert Dole. I am sure this is an inadvertant error having nothing to do with the thrust of your work, but it is a candidate for correction in future editions.

On page 5 you refer to Whitewash: The Report on the Warren Report as a still-available book. Could you please provide me with ordering information for this and your other self-published works?

Thank you very much for the work you have performed.

Sincerely,

  
Fred Nixon
