

4/8/71

Dear Herb,

If I do not have occasion to go to DC by tomorrow, I will mail this.

The stuff on the plant and the bombing begins third graph up p. 3.

The dark checkmarks were added before copying by my police associate.

My source is a minor official, inside.

Note also they stole Cathy's notebooks. At least in part this seems like a press list.

Recently they have been printing lists of genuine and imagined leftists, some authentic. I have them. My source fears some are marked for special attention.

Their Kansas list has to be from the whoreses mouth. The Minuteman wife of a Minuteman laid every student she could to get the list she collected. She worked long and hard.

They seem like nuts, but they are rather sophisticated. They are now factionalized (Jesse Stephens, Prince George's County, is under threat - I have a copy of the letter) and the original organization seems to be run by DePugh's wife. But their membership includes well-educated people and they have both scientific knowhow and access to classified materials. Plus extensive depots of arms and explosives.

I also have files on the commercial purveyors of the knowhow. One, an Army reserve major, was in the book but had to be edited out. Space.

Should NBC ever develop an interest in the right side of the violence business, which is the competent side, I do have much material and can lead you to all the rest you'd want. I had to edit out a case study flowing from the Milteer documents and the Miami tape in the appendix.

In fact, I know some of the people who provided training and have taped interviews with them, angled in other directions.

I have a suspicion that some of the recent booby-trapping and bombing has been by the right, contrived to look like the work of the left, and intended to provoke reaction.

Sincerely,

Harold Weisberg
