## THE MAN WHO KNEW TOO MUCH

*Richard Case Nagell and the Assassination of JFK*

DICK RUSSELL

This may be the most important book written on the assassination of President John F. Kennedy.

It is the story of the only man to admit knowledge of a conspiracy to kill Kennedy prior to the actual assassination. It is the story of a man who was assigned by the KGB to prevent the assassination of Kennedy by killing Lee Harvey Oswald.

Richard Nagell—a former CIA operative, KGB operative, and a comrade-in-arms of Lee Harvey Oswald—is still alive. He knows more about the events leading up to the assassination than anyone else. He may well know who planned and executed the conspiracy.

This book, the story of Richard Nagell, is based on interviews and access to personal files. The author has been working on the story since 1975. It is both his and the publisher's hope that the publication of this book will prompt Mr. Nagell to come forward, tell all, and lead us to the solution of the crime that changed history.

"Richard Nagell is a name which is totally unknown to the American public. Yet, a few years hence, it may be very familiar to any schoolchild as *the* person who 'broke' the JFK case. Despite the fact that he was ignored by both the Warren Commission and the House Assassination Committee, Nagell is probably the key witness who knew the details of the assassination and is still alive. To stay healthy, Richard Nagell must tread very softly."

—the late BERNARD FENSTERWALD, JR., *Washington, D.C.*,  
attorney and founder of the *Committee to Investigate Assassinations*.

DICK RUSSELL is a freelance journalist and formerly wrote for Time, Inc. He is a contributor to the *Village Voice* and *Harper's Weekly*. He has been working on the Kennedy assassination for eleven years and is a native of Boston. He lives in New York City.
