

8/14/70

Dear Mike,

There was a slight error in what was copied for me yesterday, from the Adrian Albe file. The original file is CD 7. The pages are 192-204. When I got home and checked this, page 199 was missing. I'd appreciate it if you could replace this for me. I presume two pages merely stuck together in the copying.

A copy of CD 146B is in the GAI-State file. Perhaps it is really the first page. It refers to a letter Slewson wrote Frank at State, dated 8/30/64. I did not see that in this file. I would appreciate a copy of it. The subject is the writing of Sean Daniel in *The New Republic* magazine, speeches by Castro and officials of our government, etc.

You will also recall I suggest you various documents in this file of which I would want copies where there was a chance copies in other files might be more legible. I remind you of this before you get them: I have order pads, for some in this file are rather indistinct.

When I returned this file, I told the clerk I had put a slip with my name on it on a single sheet document. This was to save you time in getting it to copy for me. It should be there when you examine this file to fill this order.

CDS:1-10

CDG:1-14

CDIC:4-7

I now note the Slewson memo referred to above is in this file. -- It is probably what I marked to save you time in searching. If there are other documents relevant to this of which you know, in other files, I'd like to know of them so I can examine them next time I'm in.

Thank you very much. Please check on the state of my account, so I can see to it the funds are not exhausted.

Sincerely,

Harold Weisberg
