

7/7/66 Visit of 7/6 Mike Simmons told me the transcripts of testimony are all stamped in large red letters "Top Secret". The Archives asked Justice Warren to have someone go over and remove what should not be made available and release the rest "last winter". There has as yet been no response.

The cost of Xeroxing the FBI Reports: CD1, 95pp, CD107, 91 pp, or 186 pp at 20¢, \$39.70, with no cover .

Ted Siminoski, working at masters, Berkeley, aided by brother ~~TAM~~ Dan, both pol, sci majors, 1810 Euclid Ave., Berkeley 9. Invited to supper night I'm there and to stay over with them. I helped some. Subjectm the Pres's injuries, told him some things he's not to use until after I publish, and offered further help if poss. Showed missing parts of 371, etc.

In response to questions asked earlier, Mr. Johnson told me re: FBI report, ex. 29, to ask FBI from which movie it came. He could also not answer the question about the C13 bullet, informed me all the bullets are in the possession of the FBI, and again referred me to them.

The Hughes movie apparently is not a document.

Other things in 7/6/letter from Behmer.
