

6/28/66 Simmons check, as he said Johnson did, and they can not find this. He also said there is, as I have already learned, much missing. As though it explained this, he said that last Summer two FBI agents began going over the Commission's files and removing documents they thought should not be there, but he also pointed out that in these cases, they put in one of the green sheets so stating that I have seen. He did find Document 1088, which indicates no one approached Altgens until June 2, and then only because of a piece on the Altgens picture by Dom Bonifede (approx) in the NYHT, and then the questioning was an anti-write kind, I asked for the copying of but one page, but I should get all. Here it is revealed Altgens used a Nikorex 35 with a long lense and Triex.

FBI AGENT
GEMBERLING'S
REPORT on ALTGENS
PHOTOGRAPH, 2/11/64
& covering letter of
2/19/64 from J. Edgar
Hoover to Commission.

I do not see this in
the biblio. It is
referred to in
Doc. 457

Is it available?

No such FBI
report in
Archives this
date.
