

5/26/76

Dear Donald,

While my wife is copying those CIA pages, a few suggestions.

We have only one mail a day. It comes and goes at the same time, generally about 10 a.m. There may be occasion in the future to rush something. If I'm called early enough it saves me the two-mile trip into town and the post office.

This is entirely new, entirely unpublished, with not even a suggestion of it and total suppression of it by the Rockefeller Commission. I've enclosing the covering letter.

However, I knew it much earlier - 1964. The analysis I then made that coincides with this is in Whitewash, my first book. I did not know about CIA's analysis then. I did and have the FBI's and Secret Service's, both of which I've published. This is little known. However, you have all three in general agreement and all three ignoring the missed of Tague shot.

This postulates a shot ~~it~~ at fframe 190. As I remember it I said 189 almost 12 years ago.

If you go for the use of the film, I think using it as evidence makes a difference in any reaction, like from the Zapruder heris.

And if you do thás there are more frames missing from the original than I brought out in Whitewash, when I had no access to the film. There is a gap at about frame 160.

Any shot prior to frame 210 in an of itself means at least another shooter, side from the destruction of both Commission's this means.

If you go for this and for the press conference suggestion, you can have facsimiles of what all three agencies concluded to hand out. I think this would be effective. Ig you go for a series I have other ideas.

Sincerely,

Harold Weisberg
