Lantana, Fla. 33462

Dear Bill,

Rod has told me how busy you are. I know how busy he is. I am, too.

However, I also believe that the transcript I sent you is a really major exclusive that today can result in breaking much evidence loose, is scandalous and can force a new trial.

Because of the remarkable parallels to my current suit I'm including a chapter on it in this book. In course of putting the draft together I came across several documents I believe have never been published, although their meaning was. And what seems to be still another sensation.

Were I a real expert on the RFK case, which I'm not, I'd be certain. The best I can say is that I have ^{no} recollection of ever seeing this understood. When the Sirhan defense did not contest that he had been the killer, it need not have been and probably was not questioned in court.

During the flap over Wolfer 10/71 Busch was pressed by the press. Among his "proofs" that Sirhan was the lone killer that I remember seeing in print nowhere is that the test bullets were compared with that removed from RFK's sixth cervical vertebra. I know this was on the LA CityNews wire but the meaning was never reported anywhere. The reporters missed it.

Tracing the Sirhan shooting to the sixth cervical vertebra and removing a bullet from it does not trace the cause of death. That was a non-fatal injury. A shot to the mastoid by a bullet that fragmented and ~~was~~ ^{was} not ballistically identifiable is what killed.

Just as everybody missed that transcript of the session less than a month after conviction (May 15 and April 17, respectively, 1969) so also does everybody seem to have missed ~~that~~ the meaning of this. I have the CNS original ticker copy.

In combination I think the story becomes even more sensational. New and meaningful, too.

I have put it all together other than you would and longer in this rough draft. I have used excerpts from the transcript rearranged by subject to make different points, like they had and withheld evidence, have more than the 10 volumes of summaries they now admit, the preservation to be guaranteed, etc. If this can interest you I can send copies.

The fact of the destruction of the second pistol is known. I enclose the police teletype which I believe was never used together with the evidence that identifies the wrong or destroyed pistol as the one used in the tests.

The skeleton chart is something Rod said he could use on the JFK stories. For understanding, not publication. It comes from a standard text.

Best,
