Lt. Col. John R. McCann
Acting Chief, Coordination Staff
Defense Intelligence Agency
Washington, D.C. 20301

Dear Col. McCann,

Thank you very much for your letter and the enclosure. Your letter is dated June 26. The enclosure was referred to you by NIS.

At the bottom of the first page of the enclosure following ADD ~~is~~^{is} a series of numbers that includes "5/4/64." I wonder if this means there was an addition on that date.

If this story did not become public in Australia a similar one did.

I am also interested in the name Earvey ~~Lee~~ Lee Oswald being written in at the top.

Partly this comes from how the name is written partly from the fact when there is no mention of Oswald in the message and nothing at all to suggest him.

I have no great interest in this record of "November 24, 1963" so I make no issue of the fact that it refers to enclosures not provided.

However, I am interested in why it did not surface sooner. My initial requests of DIA for all JFK assassination materials are of several years ago.

I was then told that DIA files were void on the subject.

It is my recollection that the person with whom I corresponded seemed like a fine person and that he appeared to be perplexed at not finding records.

Thank you very much for the record and for any others you may be able to supply.

Sincerely,

Harold Weisberg
