

11/13/96

Dear Bill,

Thanks for yours of the 8th and 11th, both here today. Enclosures interesting. Lil has the earlier one. And I have to knock off in a little more than 210 minutes to doctor my legs.

If the Enquirer was on the market for a JFK story what you sent them was good, as they might have done it, or other papers.

We used to have good friends there. Only one left of whom I know is a fine person and a fine reporter, there for the pay scale, David Wright.

The Swiss and others and the Nazi robbery of Jews in particular has been a major scandal for years. Thanks in particular for that article.

Too bad your brother is not more concerned about his situation and his health but on that a 2 x 4 does no good. Hope he changes and does what he can.

Good that your father's prostate business went well. He will want, if he has not been getting them, regular PSA tests and he should be on one of the medications that do help. A recent account said that proscar is not much but it was not tested the right way. I'm on it and past what they hope to get from a TRP. It is for enlarged prostates, not to prevent cancer, although such a test is in progress. It is to last I think 7 years. I do not recall the name of the other medication.

You are getting to where you should have the PSA is you doctor does not have it done with your annual checkup.

It is true that teachers teach lies and there is nothing much they can do about that—and keep their jobs.

The assassinations are but one manifestation of this.

Thanks, more later,

Harold
