

Dear Bill,

6/27/98

Your 6/26 ca^{my}e yesterday and since then I've not been able to think of how I can respond to, Can you tell me what the disc that says "ogus is?" If by this you mean the content, it is about what one member of the ARRB, the one from Ohio State, wrote for the Maryland Law Review after a shorter version of it was a prestigious speech, for Maryland law. I sent a copy to the ARRB, which is required to make all its records public when it closes down. He went in for the typical assassination b.s. and I think he used people under him at Ohio State for the work.

Congratulations to Betsy being accepted for the PhD program!

On Clay, I got a beautiful father's day card from him. What was so nice was what he added to the bought card.

I'm surprised you were able to get a Case Open because the C & G supply is, as I understand it, sold out. Must be that store's wholesaler had some on hand.

Your speech at Chase will be an interesting experience. If I may make a suggestion, my experience has been that saving time for questions from the audience serves it best. Even if they are nutty questions.

Your enclosures are interesting. What the New Republic did on Starr is the best I've seen.

Dave will be here later this early morning.

I'm about to leave for my walking and grocery shopping.

Thanks and best,

Harold
