Dear Mr. Neuberger,

I have just been given a copy of your full-page add in the NY Times of May 13, 1993. Surprising I'd not heard of it earlier! And it represents an impressive dedication.

My point in writing, however, is to tell you that there are other involvements in the JFK assassination than any by the CIA and to indicate my belief that you, like so many others, have been influenced in your thinking by those who theorizes conspiracies they do not prove with fact and present them <sup>as</sup> solutions.

That in fact there was such a conspiracy I did prove from the official evidence alone beginning with my first book, which was the first on the Warren Report. But that there was a conspiracy does not identify the conspirators.

In a book that is to be published, but I have none of the details, I use some of the formerly suppressed official records I got through a dozen FOIA lawsuits to prove one conspiracy and make a prima facie case for another. This book will also contain the documentary proof that no official investigation was ever intended or made. Thus there are no real leads for private persons to follow. I do not know when that book will appear because it is being handled for me by a friend who is arranging the publication with a small publisher. Meanwhile, past 80 and in impaired health, I spend all the time I can trying to perfect the record for history.

I realize that those who theorize conspiracies have large and <sup>dedicated</sup> popular followings but the truth is as I tell you and the end result of all that theorizing is to confuse the still-suffering people even more and to give the federal agencies, particularly the FBI, grist for their internal mill. I have countless records in which they take these theories presented as fact, debunk them, distribute them and note you see, they are all wrong, we are the only ones who told the truth. They have no trouble debunking with records attached and that is effective throughout the government.

Best wishes,

Harold Weisberg
