22ND MAY 1994

Dear Harold

Aparently the proper coding for the C.I.A project Shaw is supposed to have worked on is QK-Euchant, and not Q-Kenchant. I understand John Newman believes this project was part of the plan to Distabalise Castros Cuba. I have only been told this, so I can not be definate, for sure. There is currently a F.O.I.A request in this, but this is all I know. I will keep you updated if I hear any more positive news.

I have just seen 'Case Open' advertized in the last hurrah bookshop catalogue for \$12, so I will order my copy from there. It is good to see you back.

At this stage, I would like to say how grateful, I am for your knowledge, and help you have given me regarding Garrison. As I have probably said before, I believe that Garrison was on the right track in the beginning, but then lost his way badly, But I have always felt New Orleans was an important part in the Assassination.

Moving away from Garrison slightly, I would like to ask your views on a couple of my other main interests in the case. The first is Miami Right Winger Joseph Miller, and his taped conversation with Willie Somerset, and secondly the Antonio Veciana, Maurice Bishop, David Atlee Phillips affair, which came out during the HSCA Investigation.

I hope all is well, and I look forward to hearing from you again soon.

All the best

JUSTIN D. BUCKLEY
