

THE ASSASSINATION

OF

JOHN F. KENNEDY

NOV. 22, 1963

The murder of President John F. Kennedy in Dallas, Texas, sent shock through out this Nation. Ever since November 22, 1963, the American People have lost faith in the Government of the United States and every day that goes by, that lost faith grows. Why?

I read the Warren Commission Report on the death of JFK and soon put it away, but as time went along, questions began to enter my mind. Having spent over 25 years in lawenforcement, I began to see things that were over looked by the Warren Commission (WC), or just did not want to have more material that would take time and cause more questions to be asked.

To find out if there was a conspiracy, I would have to come up with how many shots were fired and where they came from.

I also wanted to know why no mention of a second fingerprint was never mentioned, since it was found on the rifle.

I also wanted to know why two shots were not on the recording made at the Dallas Police Dept. Only four were heard, or recorded.

The Zapruder film with the gun fire imposed, gives the viewer a good idea of what happened, except the two shots were missing--accident or?

I have gone over each shot and where it came from. I have tried to disprove each and have not been able to find any other answer. As far as I am concerned, fact is fact.

What we have is a conspiracy to commit treason.

SHOT # 1

1. The first shot came from the Texas School Book Depository and missed the President. It hit the street at the Underpass and just missed James Tague. This was the shot Mr. Zapruder heard as he began to film.
2. While some people on the ground said they saw a man with a gun on the sixth floor holding a gun, no one can say for sure it was Oswald. *
3. I can find nothing that would put Oswald at the window in question, but at this point in time, I can't say he did not fire the gun.
4. Spoke to James Tague 10PM 3-13-92 and he said the shot sounded like a fire cracker- but dull.
5. If Oswald was shooting from the 6th floor, why did he miss the first shot? Looking at his overall mental state, Oswald in his condition, and using a gun that was not perfect in sights, he could have missed. Sound will always be over looked, but it should not be, as wind direction can have an effect on placing where a shot came from.

* A man , H.L. Brennan, said he saw a man that looked like Oswald at the window and described the clothes he was wearing. At the location where Brennan said he was standing, I find it hard to believe his descriptions of the clothes.

SHOT # 1
From the Texas School Book Depository

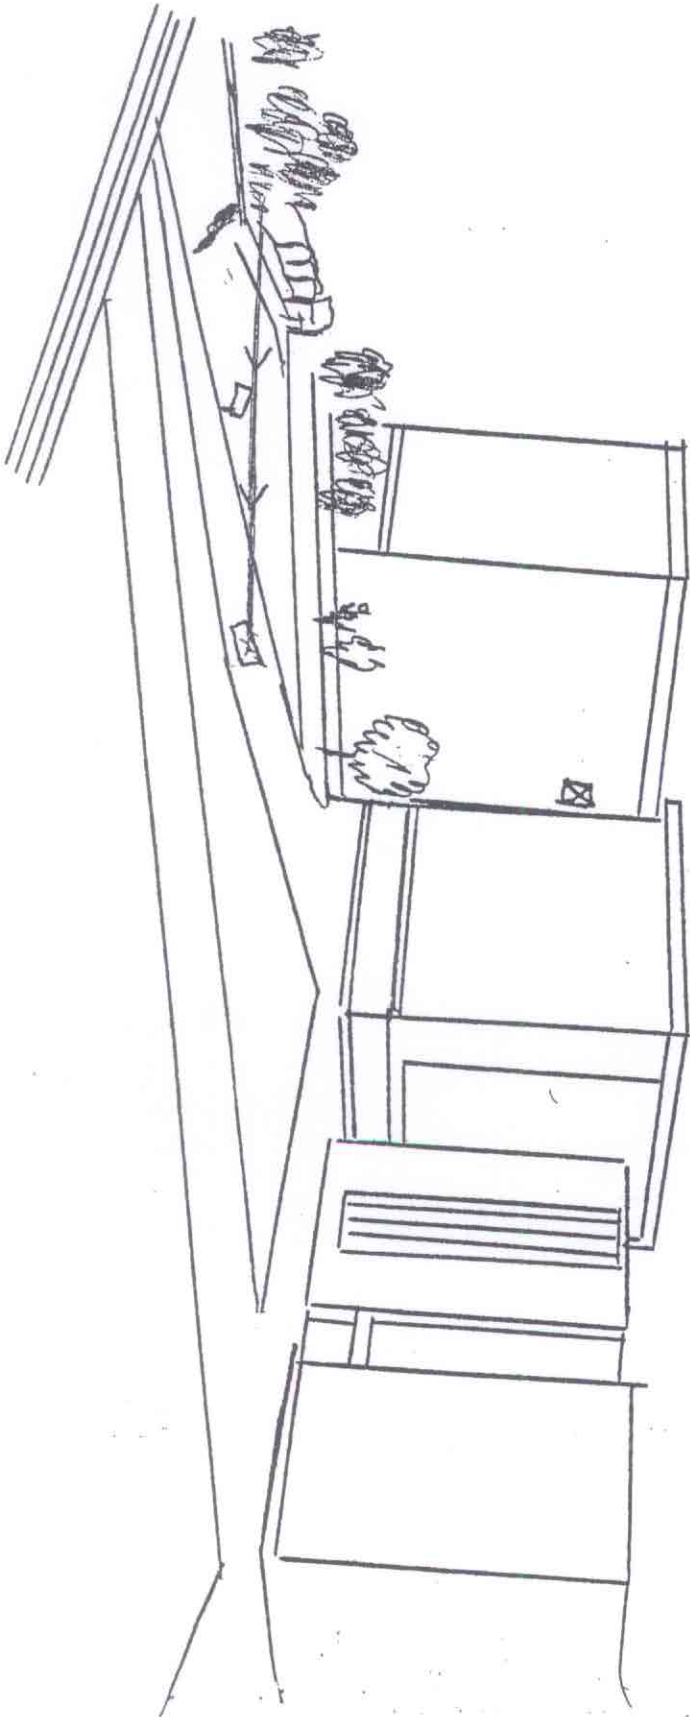

SHOT # 2

1. The second shot came from the grassy knoll, and it hit JFK in the throat. When we examine the Zapruder film, we find the President looking to his right. His head had to be turned to the right for a center point hit.
2. Had he been shot from the rear, the shot would not had been center point. Frame 188.
3. Nurse Audrey Bell, who was in the Emergency room on duty, saw the throat wound and said that it was an entrance wound. She had seen many such gun shot hits. The Doctors in the Emergency room also called it an entrance wound. I have seen many gun shot wounds and this was an entrance wound as the Photo shows.

SHOT # 2

The shot came from the grassy knoll

SHOT # 3

1. The third shot hit Gov. Connally in the back. When JFK was hit in the throat, he was to his left (27 degrees) and his head slightly down. Z-237. The position of JFK left the back of Gov. Connally open to the shot. It came from the TSB. This done in less than 2 seconds. *

SHOT # 4

1. The fourth shot hit JFK in the back and not in the neck. Had the Warren Commission looked at the shirt and coat JFK had worn, they would have seen where the shot entered the coat and shirt and common sense would then showed the throat wound was an entrance hit. Since it did not exit (the bullet) then it must have been in JFK. Poor Autopsy work. This shot came from the TSB. **
2. It is this point about the shot to JFK's back that has thrown off the Warren Commission report and it this shot which is supposed to have given birth to the Magic bullet. Fact, while the bullet does show some marks, the damage it did, would have left major damage to the bullet. I have been around bullets fired for almost 26 years, and there is no Magic in this one.

* The shot that hit Gov. Connally was not supposed to hit him, but was for JFK. Only by a slight movement by JFK caused Connally to take the shot.

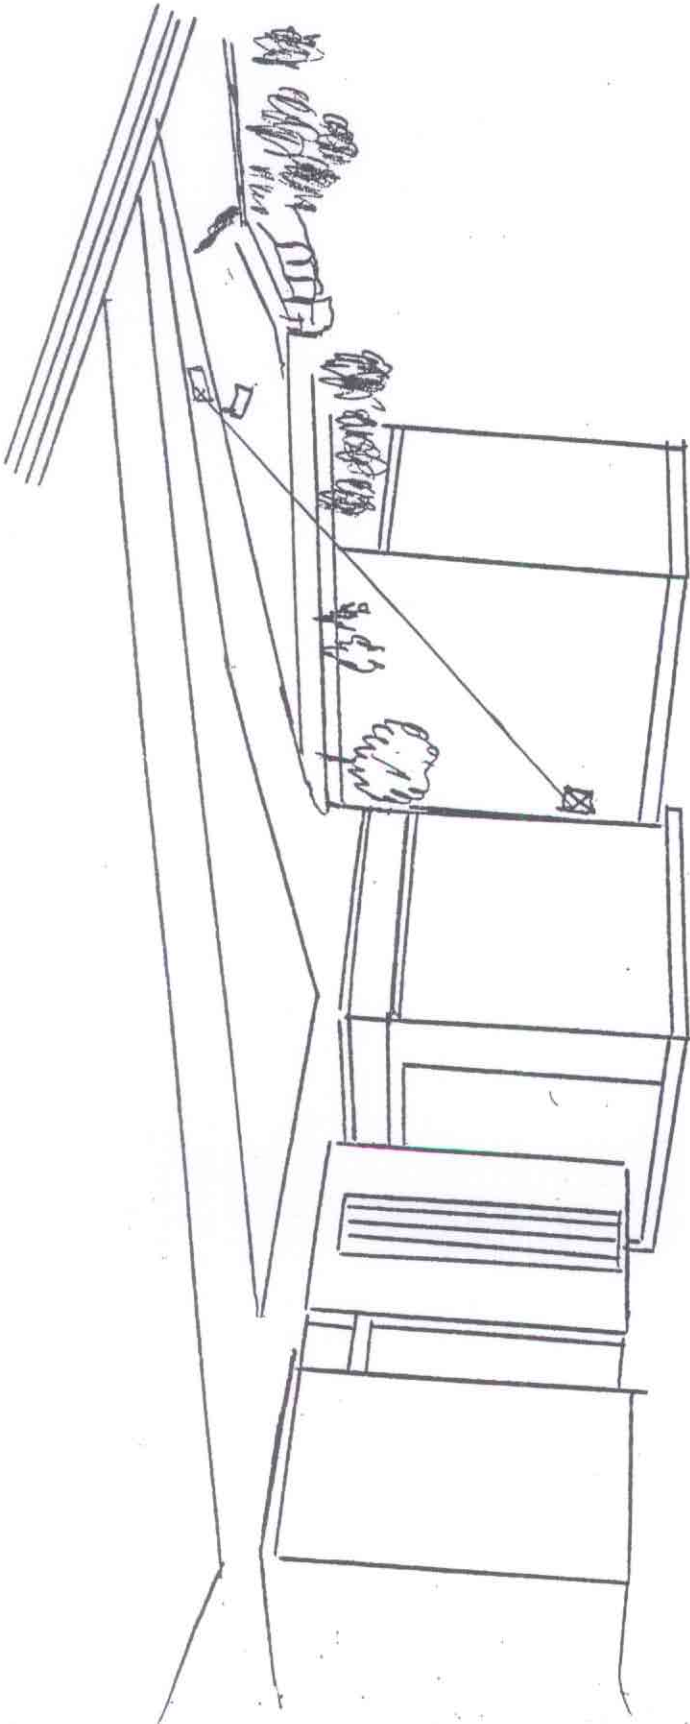

** Some people say that the shot was higher in JFK's back, because he raised his arm when hit in the throat. His coat did go up, but only after the shot. Why then did his shirt not go up? Because it was down in his pants and could not go up.

SHOT # 3

Shot # 3 came from the TSBD

SHOT # 4 came from the TSBD and within 1 1/2 seconds

N

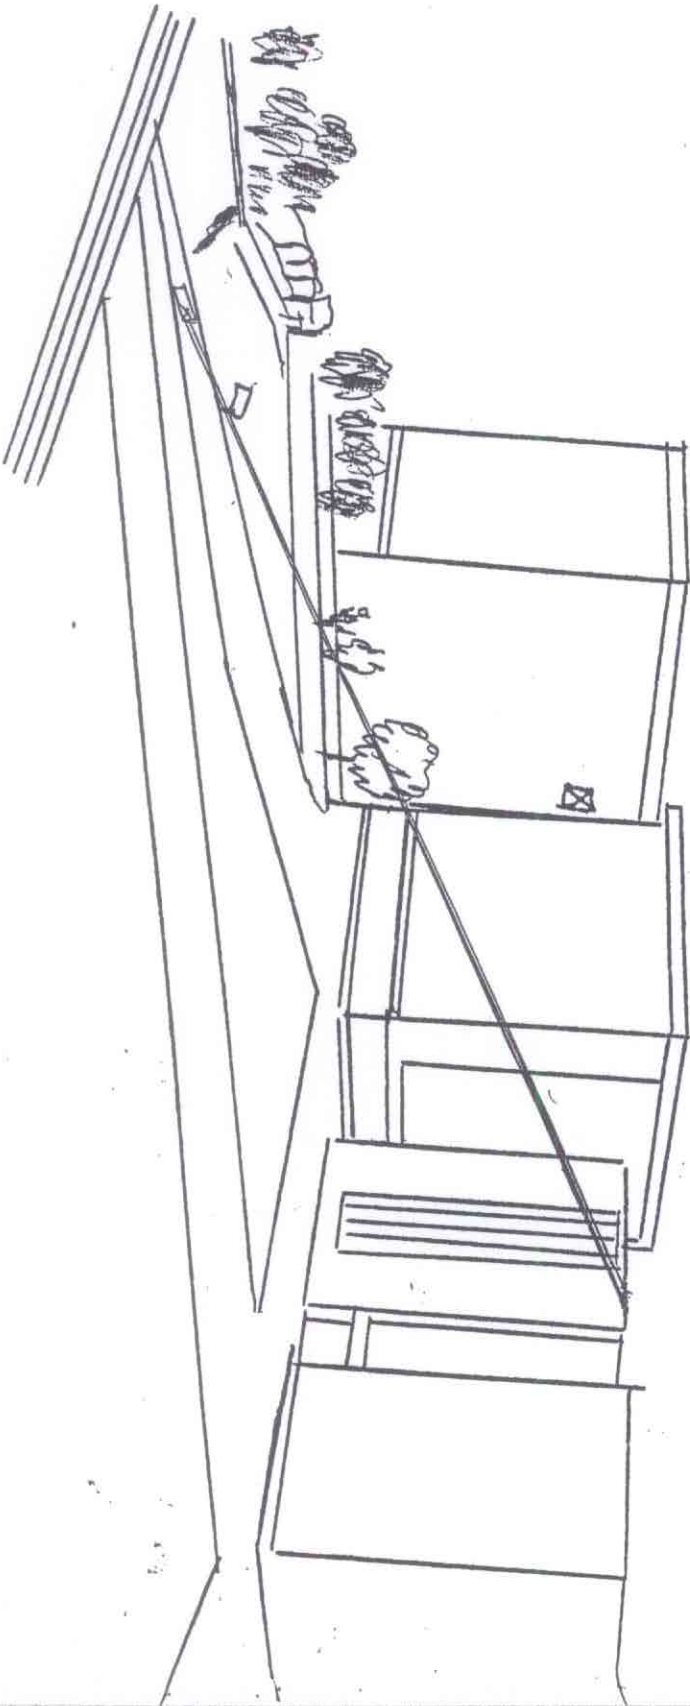

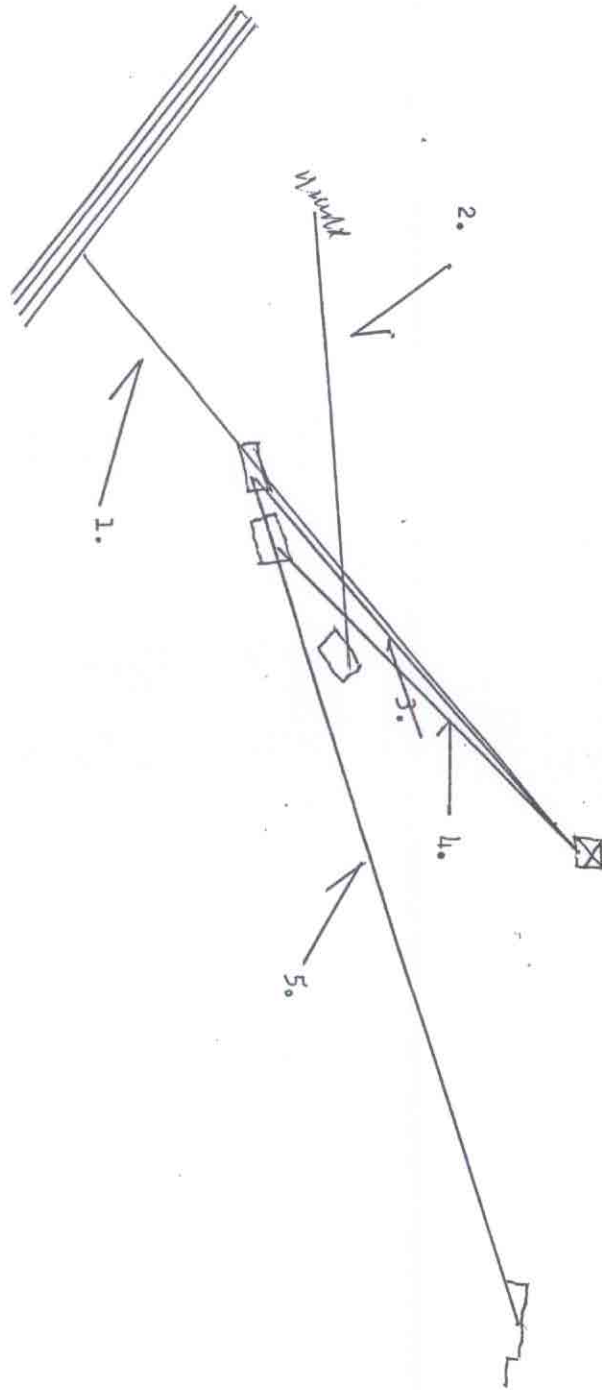

SHOT #5

1. The fifth shot came from the Dallas Records Center Building.
2. From the position of President Kennedy in the car, the 5th shot hit him in the back of the head. This was the only location where he would have had a center point hit,——the DRCB was the only location where such a hit could have come from. From the President back to the DRCB is a 30 degree line.
3. When the 5th shot was fired, about a $\frac{1}{2}$ second later, there was another shot, and where this shot went, I do not know. This could be called #6 shot.

SHOT # 5

This shot came from the Dallas Records Center
