Novel Charges Coercion Plot

By ROBERT T. ENDICOTT

The Daily News Bureau
207 Spahr Bldg.

COLUMBUS—Gordon Novel Monday said plans had been made to force a conspiracy suspect in the New Orleans Kennedy probe to confess despite a lie detector test that showed him innocent.

Novel, wanted as a material witness in the investigation, said New Orleans Dist. Atty. Jim Garrison outlined the plan at a secret meeting Feb. 21.

THE SUSPECT was former airline pilot David W. Ferrie, found dead the next day of apparent natural causes.

"Garrison needed the confession to move his case," Novel said.

The 29-year-old electronics expert made the statement in an interview to reveal 18 answers given during a lie detector test Mar. 25. He said he would make public the 100-question interview later.

NOVEL SAID he submitted to the test and to two recent truth serum examinations to prove his veracity when he reveals his story about the probe.

He repeatedly has called the Garrison investigation a fraud.

Novel said Garrison planned to knock out Ferrie with an atropine dart and "brainwash him into confessing." The dart is the same kind used to calm dangerous animals.

"**FERRIE** maintained his innocence right up to the time he died and if he had gone into court it would have ended the investigation," Novel said.

He indicated Ferrie would have rebutted testimony by star prosecution witness Perry Russo, of Baton Rouge. Russo claims he heard Clay L. Shaw, Ferrie and Kennedy assassin Lee Harvey Oswald plan the Dallas murder two months before the President was killed.

Novel said he learned the

talked about arresting Shaw, well known New Orleans business man, but advised the prosecutor against it. Shaw has been indicted on a charge of conspiring to kill the President.

ing as an operative against Garrison and was, in fact, gathering evidence to expose Garrison for a second party. He refused to pinpoint the second side but indicated it was a news gathering agency.

Novel said Garrison wants him back in New Orleans to shut him up about the investigation.

"I can sink him," Novel said. "And if I go back I doubt if I would see the light of day . . . the jail cell would be so deep."

Novel added that Garrison

background while working as a security chief for the prosecutor.

HE ALSO CLAIMED Layton Martens, Ferrie's roommate, also passed a lie test that showed he knew nothing about a conspiracy. Martens has been charged with perjury before the New Orleans grand jury investigating the alleged plot.

"I agreed to get the atropine gun and dart for Garrison but it was going to be a phony," Novel said. "It was a setup to prove Garrison's investigation was a fraud."

Ferrie died before the equipment could be obtained.

NOVEL SAID he was work-
