

Dear Harold,

Legacy of Doubt is
libelous yet dull and
often stupid, dishonest or
worse.

"Oswald - - - - - killed
Kennedy. There was no
deceit in The Warren Report."
Fergie was "involved." Thus,
Garrison and The W.C. Luke
connect! Nayer attacks Garrison
only to obscure the fact that
both use the same cast,
albeit in different roles.
Oswald, Magic Hit Man!
Of course, Nayer can produce
only one Magic link to H.H.O.-
Fergie. The only evidence
against Breeding:

He was near the assassination
site. So make "others".

He gave the police a false
name. If he didn't his
parole could be revoked
for being with Jones, an ex-
con.

He was in the same
building as Jack Ruby. This
is the one possible point
of interest. Yet it leads

towards an oil conspiracy.

Nayer alleges that R.F.K. was investigating J.F.K.'s death. He quotes a source who does "not wish to be named". How convenient!

Much of the data comes from Oruval in New Orleans although Nayer puts it in an antic context.

Nayer alleges that The Minutemen and Mafia work together. No evidence cited.

Loam Hall was "involved". Hall may be a Minuteman. Thus, by Nayer, Hall must be Mafia!

The logic appears almost impeccable. By comparison, Garrison seems respectable.

The book, in effect, denigrates The W.C., The CIA, etc.

I suppose given the author's premise, no other result could be anticipated.

What difference is there between Nayer and Belin? Damn little.
