Dear Clay,

3/5/99

I appreciate your letter dated February 29 that was atop the package that came today. I read the letter and response before looking at the rest of it/ And Lassure you that I do not question your motives and can't begin to tell you how much I appreciate what you have done and are doing.

But I think that largely you read into what you have read that is not there. At the same time in what you imply, that I am from time to time angry, you are 100% correct. It is unhidden in my writing in part because honesty demands it.

I used anighlighter as I read it and I'll addess it from the top.

I do not remember the letter you refer to and if there is in it what you see it comes at least mostly from what has no connection with the work. I can't begin to tell you the current stresses and what I am aware that they are doing. I may not be aware of all of it but what I am aware of is more than enough.

The only thing I can remember thiat you could have taken that way is the great frustration I had with the confusion caused by getting the color into the Lovelady picturws. I spent several hours trying to figure out a how it should be and that, for my present state of mind, was much too much. I finally five up on it. Yet it may have been simple and I just didn't catch it. I was aware of that and thiat is the reason kept, trying to figure it out.

I am aware that getting rouse up is not healthy for me and I try to avoid it and when I cannot I take avalium. But thanks for the cautions.

When I do not send you what I've corrected in red that is because I got mixed up. I tried other colors years ago and red seemed to me to catch th4 eye better. That means for the retypent and for me in going over what is retyped. When \pm do not send the red + was confused.

I do not have to # told there is niOmalicious Intent. And I also do appreciate the candor. I'll be giving this more thought later, when my mind is not on other things or wanting to get onto them.

On the new Intriduction for Inside, if you think it is OK please find some way of inserting it at the beginning. And for what I have to give to you on the Mailer ms, there is an added note that I ask you because you have a clearer recollection of the content by chapter than I do, it add it at the ens of one you believe is appropriate for it. Chy on the duck. Mat Method May to send MV.

What 1 think is not easy for younger people to understand that even those of us who had photographic memories lose them and, as with me, can have trouble remembering a letter of such * recent writing.

Lil appreciate you call and told me about it. She will also appreciate the

beautoful axalea that came when I was not here. I mised it by five minutes. The shape I am in required that first ' open the doot, then fix the storm door open, then, after unloading the little I had like mail, I went backheld on the rail with my can just inside the door, and picked it up. Inside the house I held it as against my body and held the came in the other hand. I'm actually afraid to try and take it out to the car but I'll get someone to take it in to her. I'm also a advaid of trying to carry it into the nursing home from where ' can park.

: 2

It seems to be planted in soil so I can Mater it and when it is finished blooming we'll get Eddie who does the mowing to plant it where "il says. Maybe where whe have other azaleas, mow where the soil is suitable acid.

If Lil can get up and wlak over to y u when you are here that will be some form I magic So she won't be able to go to Hana's with us.

T hat is one of the things that are getting to me. She has not been able to walk since mid#October and the longer has is off her feet the longer it will take her to get back on them. She has been in cinstant pains since the Thurs day before, at her request, 'Moved her from the nursing home to which the haspital sent her. I phoned its "medical director" and he did not return the call over that weekend, the home phoned him each of these thre days and he did not return the calls form the home, and I suspect that innocently the physical therapist, which could not have been informed about the more recent hip operation because the hospital did not report it, had her do more than she should have.

On the theme of opposing emotions and trust and mistrust and subsequent betrayal, I could not care less about Posner and the reason I wrote that ase (Ipen was to set the record straight. He did con us both, as did his wife, but that was not a actor in my doing that book or what I said / wit. What was published is about 20-25% of what ' wrote not all of which has been retyped. I gave Jerry one of the two retyped copies I had, something an ppened to at least parts of it, snd I've just loaned him my file copy/. On the others you, ention what you think you see is not likely because I never had any use for any of them. I told Livingstone not to come back three times. I ducked Lifton after his first phone call, when I knew nothing about him. I told him to whom to speak to get his and book that turned out to be pawfik published. He was quite annoying when he was here to videotape for Hal very, did not know what he was doing, and wasted much time for me.

On that I am aware that I am inclined not to be tolgerant at this stage of my life

I've told all the p Cople I've asked to get a psychistrist to examine "il

that I should be included. Including just about an hour before the mail came.

But I think you are wrong about "perceptions of betrayal." I have too little to so with those others for that to be a factor. But I am sometimes aware of feeling that some I care for shall I say let me down from time to time? But # I do know they have their own lives to lead.

0h the frustration you are 100% correct and that extends to many areas but not really to the work I've lived with those realities too intimiately and too long.

As a matter of fact when as I had a chance this morning to talk to someone to who might be able tobe of some help although 1 hardly know him I did just what you say is a good thing Problem is there is not ody around here to whom I can talk like that and who can do anything, nobody 1 know. And those are read and oppressive probation of which I am aware and the probability is that they will be getting harder when 1 am in dialysis. If I do not have to have the prostate roth-rooter job done over before them. And I am as well aware as I want to be of what I was treated for at Hopkins three years ago. And of the ensuing feebleness.

If I told you about it, I was angry with "edicare for repossessing the hospital $\frac{d}{be}$ that had been prescribed. That could have happened later but meanwhile, if there had been the possibility of Lil's coming home, she'd have had no bed. The

same thing is true about the special chair that was prescribed. That was to have been paid for by Medicare, I had to put out the \$700 for it, and it is sitting unused and Medicare has not paid for ie.

The unjustified medical bills are also a real problem. We have a second insurer and the hospital is sending usbill when the second insurer has not refuse dto pay them and wisks will. But can t until after hearing from Medicare. I fear that a friend who was handling bthe books before tax season paid about a half dozen bills for which the hospital by this dirty trick will be paid twice. I've hung up on the collection agency when \perp caught them lying and told them the dospital has a refusal to call me when the hospital has a refusal to pay from the second insurer.

Form my experience with the nursing homes they are more like storage bins for human wegetables. Lil has been in pain for some time and no doctors has examined her or even questioned her about it and we wonder what can possibly keep her in gain for so long. I made an issue of that at the home this morniful

There looms the financial problem. Lil's Medicare will run out soon and then the costs get heavy. For not getting indicated medical #care!

What you refer to 4s my bonds with my family are Not the problem you seem to see. I have two sisters who have between them four children, allof whom have their own lives and interests. But there is no alignation and I've kept in touch with

. 3

my sister and they inflorm their families. The older one is not able to drive the distance and the yunger one currently has a husband with some serious health problems, as dones one of their daughters. But here is nothing like anything like alienation. We have been and we remain fairly close but separated by distance. I for miles

On[d]'s side they have not been close and the ones who are closer relations are not close by, a sister, a brocher and a sister-in-law. I've kept them informed, some of them phone til and justicoday - Asaw she has cardy from some.

Her older sister has a song who lives not far away but he has n ever been real close and he just had had surgery, his wife has overcome a stroke and that sort of ties him down, and his children have their own lives and interests. Before all of this we rarely saw any of them exdept one by his first marriage. When [i] was in the hospital and first in a nursinghome she was a regular visitor. She has an *st* ailing hisband and with the sons grown and gone they have just moded and she is now getting them settled in after work. She works full-time. She and we and her hasband have good relations.

Where there were bonds they were not broken and need no renewing. With some of the great-nephews and nieces, they mever wanted to be close and were not bit there is no alienation. I doubt any but the one has gone to see Lil

I do not think I am embittered and + hope - am not! I have no trouble falling asleep but some medical probaims wake me often and I then have notrouble getting back to sleep.. Surg I have had dis pointments with some of the people but who does not.

I appreciate the time you've taken to think about this and to compunicate it and when I can I'll give it more thought but I think what is effected that you interpret as you do is that I hate to waste any of the little time I have and am frustrated by what I can do little or nothing best in our lives. When you are here, if you have the time. I'll show you a long letter Jsent to Medicale when it asked

me about Idl's "accident."I am concerned that we can run out of money, I am co concerned that I may not be able tohelp Idl when she needs help or that she may be a permanent/Mursing-home resident and that I may not be here to be of the little help that I can be. I am concerbed about the state of her mind and my inability to get any of our doctors to do a thing about.it. I am upset because there was negligence that ruined her and that at our ages there may be little we can do W about, it, probably nothing. But I am trying and if you have the time # I'd like to discuss withyou what I plan for the near future. I have raised with hedicare the possibility of faud in their being bills for what the hospital and the nursing home did that I believe is Negligence. Before then, and I held off on this,

I trued to see the head of the hospital through the mistitled patient representative. I've heard nothing irom her, no acceptance or riusal from him, and it has been more than a month. I also wrote her and asked for copie's of "il's records and got no response. Then I tried someone elso and was told that geftting them will cost \$15 plus 50¢ a page. I've sent the \$15 qnd should hear soon but there seems to be a hangup over what I regard as the Megligence.I do not know that The matter got to the head of the hospital and can believe that it was cut off b'efore it got there. "eanshile, there is only one hospital in the county for the doctors to use so they Hx are all pareful not to antagonize anyone on its staff.

5

I am aware that, as you say, what I am doing may just sit one shelf. I am also aware that what you are doing is important in giving it more shelves to sit on, so to speak. But I have believed and do believe that if I do not do it # it will not be done and if it is not on some shelf to be found what is in it will never be found. I have no reason to be lieve that if I do not do what I am doing that it will ever be done. If it is done and not use, at least it is there to be used. But if it is not do, there is no possibility of its being used. That I do feel this way and have tells you how much what you are doing means to me!

Havingthis situation has not beed a frustration to me for many years, not after my early experience. The reality is clear enough but as you known it has not stopped me and all the many new problems 1 have have not either.

It was good of you to take the time for allof this advice and I do appreciate that, too, Many thanks!

I told Lil today that you are coming and she looks forward to it, as I also do and I'm sure the McKnights also do.

If you have time question me about these things that are on your mind when you are here. And at this point Lil phoned. I'd been to the gatient 's rep. as the proper channel to the head of the hospital about five weeks ago. When she did not get in touch after two weeks I asked for copies of all Lil's records. That was thre weeks ago. When 1 heard nothing I took another channel and sent in a signed request by Lil, with a check. And Lil just told me that the patient's rep. was just in to see her and to get her to sign all over again. In "il's fstate of mind she apprently did not that that she had already signed for them. So, I wonder

if there can be some hanky-ppanky.I just phoned medical records and was told that they cannot release the records because the file is not complete. After a while I learned that the discharge summary is missing. I said I'd come in for the rest and would get the discharge summary when it was ready. I'm now stonewalled on that until the middle of next week. I and not to mail

I saidnot to amail it, that I'd come in for it. She said it is not all that may unuxual for there to be delays with a discharge summery. Now three weeks after discharge. Maybe this was unusual for them and maybe I just had the notion that there was something in the mind of the woman to whom I spoke but I did tell her that we want all of them. And I do hopg there is no hanky-panky,~

б

Of course I also wonder why the patient's rep was not back in touch with me and ignored my request for the records for three eweeks. And Then gows to see Lil and I can only wonder what she may have gptten Lil to sign and if it is only concidence that she went to see Lil for the first time aftwe so long a time because I'd made a request for the records of if something was in channels and she had just been told whatever a he may have ben told,

I guess that surgical patients are disharged without a discharge summery on file and with copies to the nursing home to which the patient is sent.

Many, many thanks,
