11 December 1987

Dear Hal:

Here is some more stuff to add to that which I sent last time and also thanks for your reply dated 12 November 1987.

I found the following of interest;

1. When the AF retrieved the student records from NPRC there were two that were missing and Powers just happened to be one of them.
2. Oswald was apparently " attached " to the Armor Company without the need of any paperwork to cover it. I wonder how they knew that he and the others had been attached if they never received any orders telling them about it? Psychic powers I recon.
3. The travel orders which Powers read into the record apparently sent himself and the other five Marines to Keesler to take a course which didn't exist!
4. Vitalie says that the training Powers and Oswald received did appear similar. I guess that since Powers said they all were in the same class and took instruction together that that would qualify as being similar right? It's kinda like two oranges being similar types of fruit aint it?

That's it for now. Best holiday wishes to you and the wife.

Sincerely,

Emory
