

6/22/68

Dear Jim,

Checking on something else, I got these pages of CD75. When Regis Kennedy makes this kind of an elaborate investigation of the dates he knows must be wrong, my interest is aroused.

On, did he then have reason to believe these were not the wrong dates?

From the same document I requested pages 295 and 341. They relate to one Radelat. They "are withheld from research at the request of the FBI".

Paul Hoch and his associates have interest in this man. I guess now we all should.

The name NAVA-Vasquez on 609 suggests that of a young man who was a friend of Philip's.

Included is the Tell report in case you do not have it. As I read these I always get the idea the witness knows more than the agent records.

Sincerely,

Harold Weisberg

Paul, please tell Hal the info he got on the Philip arrest and bailing in LA is wrong, regardless of attributed source. That's too often an undependable source.
