

Notes from examination
of Oswald's radio

push
button at top

Horiz. dial on right (volume?)

Model No. ?

TT M TT-56

(inside on
direction sheet)

J. Hyatt

insignia below speaker grill

Jack input on top (might be for phone input or antenna)

12" x 3" x 8"
(L) (D) (W)

FBI No. A-2

Weight about 6-8 lbs.

The pointer on the tuning dial was broken off and there was no power cord. Interior appeared intact, and had typical looking circuitry, perhaps 6 or 8 tubes.

Had plastic case, not much different from American table radios. Had carrying handle of conventional design. Looked generally like a mass-production, consumer item - definitely not a specialty item.

QBS, 6/13/72
