

11/18/75

Dear Emory,

*Brown*

Re 17: MY interest in what Lane is up to is to prepare for what new problems it might create. He has a record of them, serious ones. I'd like to see their literature which, naturally, they don't send me.

There are other errors, including even arithmetical, so I'd appreciate it if you can find the time to spell your second paragraph out, if possible with facsimiles. More below.

I agree with you on the possible Winchester-Western significance. Whether or not you feel you can carry this further you alone can decide.

However, though a friend I may have access to a real expert with the real facilities needed and not without some specific and detailed knowledge. So, on this separately I'd appreciate it if you could put a separate package together on the chance for which I hope, that I'll be getting together with this man.

Not only would I like him to have copies but I would like a separate explanation from you of the history of the correspondence, if it is necessary, and your interpretations.

As always, in haste,

I don't have and would like Guinn's papers, thanks.
