

Oswald Dallas Evid. to H.O. - LHMJ

3/9/79

Dear Paul,

This is another of the records copied earlier I'd not had time to look at again until now. It has the identification of the Sottman and worksheet for your information.

I'll be sending this, 100-16601-2 1A 2B separately. Hopefully with a few others.

Why this stuff should include clearly Baine material and have been hand-carried to N.O. by Vince Drain is not apparent from the content of the list. It is not originals-only photos of the originals. (I have a student organizing files and hopes to be able to get these bulkys in folders before the time she can spend is over.)

Some of the entries may interest Earl ^Wals. You may perhaps be able to provide relevant information so I include a carbon for him with which or in addition to which you can give him any information you have or think may interest him.

Item 205, p. 6 is merely "DELETED." May be innocent but if merely a mistake in numbering I do not recall a previous occasion on which the FBI represented it this way. Any suspicions? Should I appeal and ask explanation?

274, p. 9 - do we have this Oswald letter to Income Tax? I think anything of this nature can be important.

287, p. 10 notes "'620' 'exposed film with 9 negatives.'" Do we know what, have or know of prints? Odd FBI did not include prints to N.O.

On page 16 there are other photo and photographic items, with more, including "Minox lightmeter" on the next page.

With the passing of time we forget, but I thought the Marine records showed Oswald reached corporal rank only. Am I wrong? P. 5, Item 198 has his mess pass as Sgt. I know a mess pass was transferred to the Archives and realize it can be this one.

I've made a special file of this list and have put a carbon identical with the one I'm enclosing for your response so that in the mass and confusion I'll remember. It is in the special subject file I've established from the field office releases, to which I'll probably add significant HQ copies as I see them.

Best,
