7/26/87

Dear Emory,

I've seen nothing further about Oswald at Keesler.

I do not know the procedures used by the "arines with their Form 20s.

But I find myself wondering if what he was attached to, under remarks, meant while at Keesler.

I'm not now sure but I think that when I was in the army that Oswald was transferred to HQ, DC, meant he was being reassigned to a new or permanent station. Not to HQ.

I think this can be taken to mean that Keesler was not aware of the coming assignment of LHO. But I'm not sure.

As I think back now I'm still wondering why so few records remain of any training for jobs that required so high a security clearance.

It would seem to me that not just Oswald but for all Marines or others trained for the kind of job for which he was, the school would have kept more info.

I think that most of the Keesler training in control work was tower control. It happens that a few weeks ago I heard from a younger relative who took training at Reesler and became a control tower operator. Within the next year he'll probably be here and I'll see if he can shed any knowledge.

Thanks and best wishes.

rên.

Dear Hal:

Several years ago we were interested in Keesler AFB and I sent you a copy of the attached document. You will note that it states that LHO was attached to I&I 1st ArmAmphCo, USMC (Block 5) which would seem to contridict the "official" record which states that his next assignment after Keesler was the 4th Replacement Bn Air FMF Pac. I was wondering if you ever looked into this matter? If you have anything on this and would care to share it, I would be most appreciative.

Sincerely,

Emory Brown
