

Dear Jim and Mark,

2/7/85

That the xeroxes of the # 5x8 card file on her interviews includes what I do not recall from records I've read, it is possible that I've forgotten and that I missed or skipped some. And some of the names are new, like Franklin, and I do not know why she was asked. The student who did the paper on Marina's treatment by the FBI will be here again soon and I'll give her this and ask if she recalls seeing those records. If she has anything to say, I'll let you know.

This is a political and incomplete summary, for special reasons. It avoids known and existing records that were certainly known to the SAs who prepared these cards. The first are by our old "liberal Harvard lawyer" friend Goble, I'm pretty sure. He was a Soviet expert before he was sent to New Haven Field Office.

These copies are not made from the original cards, which may or may not have later information. They are made from earlier, bound xeroxes of the originals.

So I wonder why the FBI went to all this trouble and expense only to limit itself to some of the information it had and I conclude that it didn't, that there are other such cards holding information from sources other than the FBI's interviews with her. Like what she gave to and told the Secret Service, the info from the electronic surveillances, etc.

While I did not read all the headings (I read while Ed was with her mother on a medical appointment and wanted to complete the reading in that time) I note that Hosty was in on the 12/27/63 interview and I wonder if this is not contrary to what he said or another said, that he was taken off the case 11/22/63.

If there are other cards like these then I'd conjecture that the reason for keeping them separate is political. I also believe that Goble did not get all the available info because of some slight errors he made and conjectures he would not have made.

That they did this, went to all this trouble and cost on Marina, suggests strongly that they did more of this kind of thing because there were people who would appear to be much more important to the FBI, at least in terms of the assassination and its investigation and in covering its own ass.

This, too, is both a tickler and a divisional record, as you may want to recall on remands.

I've identified these as disclosed to Mark in his litigation but instead of placing them in a file I have of those records I'm putting this in the subject file, where it can be of more use to people in the future.

Best,
