

November 23, 1994

Dear Mr. Wessler

Mr. Bemeddy was killed in a Drug Run in Texas. His brother and he had been investigating how come they had not traced from New York about wasn't long before we were didn't look good in their business.

Data will prove otherwise. It wasn't long before the hospital in New York were full of acid patients. They thought it was a disease because it had some of the fruit marketplace in the stores and they were full of acid patients. I don't see why they pulled a white wash myself instead of a Campaign by Sydney Johnson of a Great Society.

Cocaine shipping will lead to a way for them to pay no taxes at all.

4.
Shipments were being made to New York from Peru, Columbia and more other big people of the Panama Path in Peru.

California was another place hit beyond belief. All the movie stars were throwing up with aids.

If you read the latest Reader's Digest magazine you will read where they are all traveling trouble with amphetamine in an article with a New York politician and a Herman Shapiro, they had made one of the biggest bust in New York on Cocaine. Somehow it is the government is deciding to pull a cover up either there are alot of people in the U.S. who are looking for a better source. Our health

5.
are wondering why they have to take care of plague victims when in other plagues like typhoid where public resources will they were suited.

John Kennedy and his mother may have been the first people killed over cocaine but since then they and some politics have been shot in similar incidents because they fear too much. It's funny why celebrities with one stroke have like Janice Joplin and Quincy Nelson, all no label in an overdose of Cocaine.

I think it ~~is~~ is about time you publish a letter on the cocaine connection and you will have enough ~~that~~ statistics to prove that theory of the killing of John Kennedy and his father. People who sell Cocaine ~~is~~ will pay no taxes.
