## 12.24/94

John Petrello 41 Zabrieskie St., Jersey City, NJ 07307

Dear John,

This is to say thanks and to hope that when yu get this you'll have had a fine Xmas. And to tell you why I say thanks again.

I've just finished the rough draft of what I've written about (fiebling and his Wedge. It is longer than Epstein's inquest. And when I went over those chpaters you sent me I saw more possibility than on initial reading. That is why it grew to this length. I think it will be a worthwhile record for our history, if nothing else, particularly on the dishimesty of publishers. Knopf, which is now Random House, knew what it was doing. There is too much that should have been pikeed up on we reading and editing that is in the book. and should have been pikeed up on we reading and

I have it to now read and correct and then try to get retyped. I've not heard from one of the young women is retyping the shorter draft of one book in several weeks or the one who is retyping a very long ms. to which I'll addithis in a month! I asked the college to put up a notice of typing bork but no response yet I think because the end of the term was on hand when it went up. Or I hope!

There was a student here yesterday, day before, one I'm helping with her work, and she etrieved from the basement for me what I'll pick up citations from. I wrote those things from a memory, what he omitted from the CIS Nosenko file and the FBI's. She'll be back after a week and will refile them. What a way to work, huh?

There is one more thing on this that first of all I tell you is not essential so you'll not put yourself out if you do not have the time. I go into the monopolistic trend in publishing at the beginning of this and that What the Handom House empire does this ax job on history right after Posner's. For that it would be good to be able to add just what Random House is and owns now. I remember there was some kind of controversy there a little over a year ago. It made the papers. Berhaps that also would be interesting. Many left then, disgusted. But what I have in mind is simple of you have the time. Years ago when I used to do that kind of research there were two standard diredtories that had it all. One was Poor's, the other Moody's. It, they give the corpirate structure and the wonership.

I also refer there to how Dell, Bantam and Doubleday, formerly competitors, are now all part of the same corporate structure, to that about Time/Warner and Penguin/Viking. On those if you have the time only the names of the different publishing outfits now one.

If you do not have the time, thanks anyway. This was worthwhile and you made it possible. With best wishes for the holiday season, , ) //

faid
