

Ruth + Michael Payne 11/13/66.  
He came back from Spain coming  
toward the end of the week.

They also have real nothing,  
They have O. in H.O. on the shelves  
Their basis for believing the WR  
is their looking for the American  
people they met who were so nice  
They could not possibly be ~~that~~  
wrong! Hardly an intellectual  
approach or the result of the  
intellectual process.

She is very fat, thin, back-poked,  
with wavy lips & an endless need  
for sleep. She said she was going to go to  
bed at 9:00 p.m. She kept on  
talking about it but never did.  
Their new home is a graduate of  
expensive. Paul's estimate of it  
cost \$75,000. He says their other  
home burned up.

Michael also is fat & thin, with  
his eyes coming unproportionally large. This  
is true not from stress, because he is a

man, seems to be, with very small teeth  
so fast a man. The back of his neck  
seems scathed.

Paul R. seems to believe R is both  
a nymphomaniac & a child lover. Person  
says someone is a nymphomaniac, with two  
men supplied, besides the husband, to  
satisfy her. He says they are long with,  
now of housework, had several relations  
with woman for a while as part of  
his "work". Paul has an odd, &  
a strange look, but her appearance does  
not suggest homosexuality.

The Michael seemed not to look at  
any thing I had looked at & in so  
doing put his arm around her, ~~with~~  
brutely.

They are a strange-looking pair.  
The furnishings were not good. The  
the green-covered from sofa was well  
worn, as it would surely be with  
children. It was well-kept.

There is a large, raised brick  
fire place in the living room. A log was

going in it when he entered. I did not look closely at it. But with no other logs visible, none stacked on a mass the height, and no spots, that I could see, I now wonder if it is a good log. If it is, I think a lot of me it does it quite - but's into it.

The Pains, I think, do have questions & are unwilling to give an answer them. I am here in the middle of great matters & pretend they have no interest in them. The men from London this night by word, but not for the effort.

I wish them to let me know if they recall any thing that might be important with this activity as a federal agent.
