

Dear Oliver,

10/31/78

Glad you called yesterday.

My wife made copies of what you sent for Jerry as well as me and I've written Jerry a short note explaining that you asked to have them sent to him. I am not sure they will make this morning mail but if not they'll go out tomorrow. My wife is having some trouble with a leg so I'm letting her sleep. I never touch her work for fear of mixing it up. She went to bed after making the copies because the leg was bothering her. But this is to let you know it has been done. I'll return your copies to you with the batch you say is in the mail to save making a package.

What you sent should be helpful in getting more records from the FBI. I'll send you what I get. You can tell Geppert this about his records, too.

When you had to get off the phone I'd asked you how the FBI tipped you off that Jerry knew you were coming out. Had they been in touch with you after you first stopped reporting? Did they ask you to work for the HSCA? Did they keep in touch with you then?

If they've re-subpoenaed Jerry I've not heard from him that they have. They did set John's hearing for about the end of their hearings, I suppose to build up to him as the one who financed Jimmy by bank robberies. Silly but all they have.

If there is time perhaps you can give me some advice on a small TV from my desk so I can use it infrequently for news and for the hearings. I have a good 12" Sanyo I'm letting my lawyer have because it is about 15" wide and I need more space, some of the space it takes up. I want to get with with at most a 9" picture, maybe 7" if they make them and they don't cost too much. I've seen ads for smaller ones at about \$125 but don't know anything about them. The Sanyo is a hot little set, esp. on UHF, which is good in the fringe-mountain area in which we are. If your experience tells you what is a good one or what is not it might help me. I don't know what is available locally. I know there is one dealer who does not stock the Panasonic line but gets delivery from Baltimore on anything they have.

With an earphone jack, which I suppose all small sets have, I can plug into a tape recorder.

I've heard no more rumors from the committee. As reflected in calls to me there is no press interest at all.

Sincerely,
