

Dear Oliver,

11/10/78

The transcripts did go out yesterday morning. You should have yours before this can go out. In addition to the one for Ms. Donna in Cong. Davis' office I also sent one to Jim Lesar on the chance he has a need for it and so that there will be one in Washington outside the committee's hands. It would be awkward asking Davis' office to make it available to anyone. (I really mean both, including tape transcripts.)

I don't know when I'll get the FBI's records on you. They have done some work on this because of what they gave the assassins. I heard from the appeals office yesterday. Whenever I get these I'll send copies to you immediately. I'd appreciate it if you then tell me if they seem to be complete. I say this now because I may get the records when I'll be too busy to write. Also, more work is stacking up on me because we've had exceptional weather and I'm using it to get natural exercise, which is the best medicine for me.

You have an idea of what John's situation is from what you mentioned about Clyde. I think I wrote you and told you that Jerry had mentioned a Turley the same way. If you know or suspect anything else along these lines please let me know as soon as possible because I think there may be another scheme to put John away on a framed perjury charge.

If you heard the broadcast of the hearings you know what the assassins did to Lanc. Which also means to Jimmy. If they know their business they could have done more. They really do not have all that good a command of the facts.

One question that will come up with the FBI records is the period of time you were their informer. If you recall the period please let me know when you can. And if you recall the way it ended.

By the way, there was a page missing in the New York transcript. In place of it was a blank sheet of paper.

Sincerely,
