Dear Dave,

Thanks for your interesting answer to Posner. We sized him up wrong, too, and I think he is a pro at that kind of thing. Your case reminded me of something I'd intend to use and forgot to and of something I do not remember at all, Poe's net marking ~~net~~ ^{on} those shells. The other was "Penman standing/sitting on wall."

As I've told Gary and Mary only, Gary to tell you, I've most of a book done on what he and those supporting him did. I want no talk about it because that always means calls and letters and while I can I want to get as much as I can on paper.

I was surprised and disappointed not to get any response from Failure Analysis.

And I'm real close to that writing.

If you have anything on that ABA The Trial of Lee Harvey Oswald and the decision I'll appreciate it much.

Of if you spotted anything wrong in his FA appendix I've not yet examined closely.

Their not giving me anything demands that I analyze their failure!

And some are pretty obvious!

Thanks and best to you all,
