## The 1968 Election

*Nick Munro  
10/24/68*

This editor thinks it makes little difference which of the three candidates is elected to the Presidency. The military and the police are in control of the country.

Although the candidates are equally controlled, two of them do have the grace not to insult publicly ten percent of the population as does George Wallace. Frankly, we think Wallace is in the race just to make Nixon appear more reasonable.

This editor will not vote for any of the Presidential candidates. Hopeless though it is, we will write in the name of Dick Gregory for President.

This cry of anguish is being printed because we want to repeat that we feel this government was involved in the assassination of President John F. Kennedy, Rev. Martin Luther King, and Senator Robert Kennedy. The groups who took over the country like what they got and intend to keep it as long as they can.

Only the youth have the courage to even look at such frightening facts. We feel that opposition by the youth will soon be liquidated by rifle fire. By the time the youth move from their present position of love to fight, the guns will have been collected from the American people.

The entire adult population knows the Warren Commission was a cruel hoax, but are too cowardly to do anything about trying to correct the evils. This means the military and police will continue to consolidate their position so that this nation is completely gone as a democracy.

Hitler lasted twelve years as an absolute dictator with half the world trying to bring him down. We doubt that the rest of the world will even care what happens to the people of the United States.

Americans may not want believe such outlandish remarks, but the rest of the world knows they are true.
