

Reur memo; "Something isn't right!" True. And one way of learning <sup>more is if</sup> ~~is~~ more is if the Librarian will work backward, years by year, in Martindale & Hubbell and also in Who's Who and Contemporary Authors.

This also means his law firm connection is of the past.

He could not have been in Wall Street very long, being admitted in 1979, no lost time when born in 1954.

He has to have spent some time on at least two of the earlier books, Mengele and Hitler's Children. Plus two years on this.

He was not a lawyer for long. Ought we not wonder why?

I'm more interested in more bio info if it can be gotten!

Especially if there are <sup>any</sup> ~~any~~ voids in it.

And I wonder why he is still listed in the lawyers' directory if he is not practising law and has not for ~~or~~ several years.

I wish I knew someone who could go to the New York City main library. Or of Congress.

And do this checking.

After I spoke to Lardner and told him where Failure Analysis is he spoke to the man more or less in charge, found out that there was the other side Posner omitted and what I knew and Posner did not say, that the jury hung.

I've written FA.

H 9/17/93

Reference; Madison Lew library

Star

Gerald L. Posner

Very sketchy (librarian words)

1993: Martindale & Hubbell (now change from earlier NY Ct.)

6. 1954

Admit 1979 to the bar

B.A. Berkeley but no date

Gannon, Eire Pa., law school  
but no date. Lives in Manhattan

this is it!

No other reference found.

Not a prestigious law school at all.  
which raises question on why a  
N.Y. City law firm takes him  
rather than Yale & Harvard &  
Chicago graduate. Something isn't  
right.

9-14-93

as you know when  
Posner says ~~that~~  
he detects Connally's  
lapel moving from  
hit of bullet at 222K  
there is no hole in lapel  
but in body of jacket

? a lie or calculated  
deception.  
or stupidity.
